

Zoo Field Trip

The third-grade class at Thomas Elementary School goes on a trip to the zoo. Students are in groups of 6. Mr. Bell's and Ms. Bailey's classes are combined.

4. **Make Sense and Persevere** The teachers want to know how many groups will be in the combined classes. What do you need to know to solve?

5. **Use Reasoning** Find the number of groups in the combined classes. Write an equation for each step. Explain how the quantities are related.

6. **Critique Reasoning** Ryan solved the problem above. He says there are 6 groups of 6 students and 1 group of 5 students. What did Ryan do wrong?

7. **Generalize** If you wanted to find the number of groups of 6 students if Mr. Bell's and Ms. Bailey's classes were combined, could you use the same strategy you used in 5? Explain.

Classroom Teacher	Number of Students
Mr. Bell	18
Ms. Bailey	24
Ms. Hale	12

Make sense of the information in the problem by identifying the quantities. Think: Is there a hidden question I need to solve first?

Work with a partner. Point to a clue.

Read the clue.

Look below the clues to find a match. Write the clue letter in the box next to the match.

Find a match for every clue.

Clue **A** is equal to $35 + 19$ **E** is equal to $72 - 24$ **I** is equal to $39 - 17$

Counts! Paul Shoecraft, 2025-01-24 Dr Shoecraft may be the only mathematician since the New Math in the 1960s to seriously analyze the lowly subject of arithmetic and how to teach it His breakthrough came when he experimented with teaching what needs to be understood instead of known memorized like teaching why addition problems until the algorithm they are using supposedly becomes cemented in their brains By teaching the essence of arithmetic in sensible ways and appealing to children s love of games songs and movement he s proven that virtually ALL children can learn arithmetic the foundation of algebra higher mathematics science technology and more even music When children understand arithmetic they own it It s no lonver just their teacher s math It s their math America s children are being held back in math because of how arithmetic is drug out in elementary school Virtually every textbook based elementary school math program in use today is mind numbing in its repetitiveness from grade to grade The reason for the redundancy is to slow down the teaching of arithmetic so it can be memorized Research shows that the human brain is not designed to remember things learned by rote when no longer practiced That s acknowledged in the use it or lose it aphorism that states the obvious that we remember what we use and forget what we don t You know that to be true if you ve ever forgotten things you once knew as well as your own name things like an old address or a license plate number Every child can understand base ten numeration when taught hands on with arithmetic blocks Thereby every child can understand base ten arithmetic And every child can learn how to count out the number facts like $5 \times 7 = 12$ $17 \times 8 = 96$ $X \times 7 = 42$ and $56 \times 7 = 8$ and if they forget one never have to guess and risk ridicule and bad grades if they guess wrong What matters in teaching arithmetic is not how much a child can remember but how much they can figure out if when they forget **Scott Foresman-Addison Wesley EnVisionMATH en Español Texas**

3 Kimberly M. Sheridan, Shirley Veenema, Ellen Winner, Lois Hetland, 2022-06-03 Studio Thinking 3 is a new edition of a now classic text a research based account of teaching and learning in high school studio arts classes It poses a framework that identifies eight habits of mind taught in visual arts and four studio structures by which they are taught This edition includes new material about how the framework has been used since the original study with new perspectives from artist teachers

who currently apply the Studio Thinking Framework in their own practice It also reviews how contemporary organizations educators and researchers outside the arts have utilized the framework highlighting its flexibility to inform teaching and learning The authors have added a new chapter on assessment to introduce the practical and thoughtful ways that teachers are using Studio Thinking to assess and evaluate students work working processes and thinking in the arts Praise for Previous Editions of Studio Thinking Winner and Hetland have set out to show what it means to take education in the arts seriously in its own right The New York Times This book is very educational and would be helpful to art teachers in promoting quality teaching in their classrooms School Arts Magazine Studio Thinking is a major contribution to the field Arts Learning Review The research in Studio Thinking is groundbreaking and important because it is anchored in the actual practice of teaching artists The ideas in Studio Thinking continue to provide a vehicle with which to navigate and understand the complex work in which we are all engaged Teaching Artists Journal
