Frames in the Toxicity Controversy Arnold Tukker, 2012-12-06 Preface When you write a book like this after ten years working as an environmental specialist you end up with something that reflects your career Of course when I started working at the Ministry of the Environment in the Netherlands I could not foresee that I would now be at TNO nor that I would have performed research into chlorine PVC waste etc that would come to form the basis for this book But step by step with some coincidence and with the support of several people who were probably unaware of the crucial role that with hindsight they played I arrived at a position where I

could start to consider this enterprise At this point I shall try something dangerous thanking a few of those people who gave that support At the same time it is obvious that I cannot mention them all I hope that those whom I do not mention will forgive me A first crucial moment in this sequence of events came quite soon after I joined TNO in 1990 Just a few weeks later all the senior staff in my section decided to leave in order to set up their own company I decided to stay at TNO As a consequence I had to manage it on my own     **Labour Gazette** Great Britain Department of Employment,1921     **Official Airline Guide** ,1973-07     **Research in Education** ,1973     Management Audit Illinois.
