The Outboard Boater's Handbook David R. Getchell, 1994 This comprehensive manual shows you how to go places and do things you never thought possible in a small outboard motorboat A well designed ruggedly built 17 footer for instance can fish offshore circumnavigate Lake Superior and crisscross the continent on inland waterways or on a trailer pulled by the family car Small outboards are among the most versatile boats ever developed and are far more able than you might expect Covered here are all the popular types and some exciting alternatives as well as methods that may change your entire boating outlook Aided by contributions from other experts veteran outboard skipper David R Getchell Sr offers a wealth of useful facts and special savvy that reveal for the first time in a single book the true potential of these democratic boats 20 feet and under Here are the means to understand what can be done and the way to do it safely including how to judge a boat's potential and capabilities based on design and construction how to rebuild an older boat how to handle a little boat in big seas surf or shallow water how to navigate how to read the weather how to head upriver or offshore how to trailer your boat how to manage and equip it for camp cruising on a nearby lake or for subarctic exploration and how to care for the boat and motor
