4 Foot Farm Blueprint:

4 Foot Farm Blueprint Same McCoy, 2013-06-06 In just a few minutes of reading you're going to uncover a sneaky yet legal way to claim healthy mouthwateringly delicious food for just pennies on the dollar. A method that could cost overpriced grocery stores a LOT of money. It's designed based on simple food secrets rediscovered by international botanist Patrick Blanc and reaches back to techniques uncovered by ancient Babylonians. It's all based on growing your garden vertically instead of the normal space-wasting horizontal way. The best part is this blueprint gives you a simple method to grow your food with no more than 4 square feet of space.

The 4 Foot Farm Blueprint, 2013 First of all I would like to congratulate you on moving toward a more sustainable and self-reliant lifestyle by learning how to grow your own food. Growing my own food has been the most satisfying thing I have done to improve my own independence and I hope that soon you will be experiencing some of the same gains yourself. This book will provide you with a lot of information in a small amount of space and time but don't get overwhelmed. As you start to build your own garden you can come back to this book and review different ideas to try and find some inspiration for moving forward. This probably won't be your only gardening resource and it shouldn't be. The more sources you can use to derive information the better off you will be.
