

Chapter 4 Corresponding Parts in a Congruence

Lesson 4-1 Congruent Figures

When two figures have the same size and shape, they are **congruent**.

Triangles ABC and DEF are congruent. If you mentally slide $\triangle ABC$ to the right, you can fit it exactly over $\triangle DEF$ by matching up the vertices.

Euclidean Geometry David M. Clark, 2012-06-26 Geometry has been an essential element in the study of mathematics since antiquity Traditionally we have also learned formal reasoning by studying Euclidean geometry In this book David Clark develops a modern axiomatic approach to this ancient subject both in content and presentation Mathematically Clark has chosen a new set of axioms that draw on a modern understanding of set theory and logic the real number continuum and measure theory none of which were available in Euclid's time The result is a development of the standard content of Euclidean geometry with the mathematical precision of Hilbert's foundations of geometry In particular the book covers all the topics listed in the Common Core State Standards for high school synthetic geometry The presentation uses a guided inquiry active learning pedagogy Students benefit from the axiomatic development because they themselves solve the problems and prove the theorems with the instructor serving as a guide and mentor Students are thereby empowered with the knowledge that they can solve problems on their own without reference to authority This book written for an
