decisionism emerged from its origins in prewar political theory to become an object of intense social scientific inquiry in the new intellectual and institutional landscapes of the postwar era By bringing together scholars from a wide variety of disciplines this volume illuminates how theories of decision shaped numerous techno scientific aspects of modern governance helping to explain in short how we arrived at where we are today Changing the Course of Failure Sandra

Stotsky,2018-05-18 The basic purpose of this book is to help policy makers at all levels of government understand that 1 widespread adolescent underachievement is not susceptible to solution by educational interventions no matter how much money is allocated to public education and 2 there are unidentified educational and civic costs to focusing on low achievement and to expecting public institutions of education for K 12 and college to solve a growing social problem Many policy makers seem to think that teachers schools are the primary cause of low achievement Educational institutions still cannot solve a non education caused problem and haven t done so for over fifty years despite all the public and private money that has been allocated The book concludes with suggested policies for addressing the damage to public education from gap closing standards and with suggested areas for policy making in order to change the current course of failure for many low achieving students **Implementation and Critical Assessment of the Flipped Classroom Experience**

Scheg, Abigail G.,2015-01-31 In the past decade traditional classroom teaching models have been transformed in order to better promote active learning and learner engagement Implementation and Critical Assessment of the Flipped Classroom Experience seeks to capture the momentum of non traditional teaching methods and provide a necessary resource for individuals who are interested in taking advantage of this pedagogical endeavor Using narrative explanations and foundation materials provided by experienced instructors this premier reference work presents the benefits and challenges of flipped methodology implementation in today s classroom to educators and educational administrators across all disciplines and levels *Stopping the Spies* Jane Duncan,2018-06-01 Is South Africa on its way to becoming a surveillance state and will it

need a whistleblower In 2013 former National Security Agency NSA contractor Edward Snowden leaked secret documents revealing that state agencies like the NSA had spied on the communications of millions of innocent citizens International outrage resulted but the Snowden documents revealed only the tip of the surveillance iceberg Apart from insisting on their rights to tap into communications more and more states are placing citizens under surveillance tracking their movements and transactions with public and private institutions The state is becoming like a one way mirror where it can see more of what its citizens do and say while citizens see less and less of what the state does owing to high levels of secrecy around surveillance In this book Jane Duncan assesses the relevance of Snowden s revelations for South Africa In doing so she questions the extent to which South Africa is becoming a surveillance society governed by a surveillance state Duncan challenges members of civil society to be concerned about and to act on the ever expanding surveillance capacities of the South African state Is surveillance used for the democratic purpose of making people safer or is it being used for the

repressive purpose of social control especially of those considered to be politically threatening to ruling interests She explores the forms of collective action needed to ensure that unaccountable surveillance does not take place and examines what does and does not work when it comes to developing organised responses White Paper on Science and Technology

,2015 Planning Support Systems and Smart Cities Stan Geertman,Joseph Ferreira, Jr.,Robert Goodspeed,John Stillwell,2015-05-22 This book is a selection of the best and peer reviewed articles presented at the CUPUM Computers in Urban Planning and Urban Management conference held in the second week of July 2015 at MIT in Boston USA The contributions provide state of the art overview of the availability and application of Planning Support Systems PSS in the framework of Smart Cities **Critical Mathematics Education** Paul Ernest,Bharath Sriraman,Nuala Ernest,2016-01-01

Mathematics is traditionally seen as the most neutral of disciplines the furthest removed from the arguments and controversy of politics and social life However critical mathematics challenges these assumptions and actively attacks the idea that mathematics is pure objective and value neutral It argues that history society and politics have shaped mathematics not only through its applications and uses but also through molding its concepts methods and even mathematical truth and proof the very means of establishing truth Critical mathematics education also attacks the neutrality of the teaching and learning of mathematics showing how these are value laden activities indissolubly linked to social and political life Instead it argues that the values of openness dialogicality criticality towards received opinion empowerment of the learner and social political engagement and citizenship are necessary dimensions of the teaching and learning of mathematics if it is to contribute towards democracy and social justice This book draws together critical theoretic contributions on mathematics and mathematics education from leading researchers in the field Recurring themes include The natures of mathematics and critical mathematics education issues of epistemology and ethics Ideology the hegemony of mathematics ethnomathematics and real life education Capitalism globalization politics social class habitus citizenship and equity The book demonstrates the links between these themes and the discipline of mathematics and its critical teaching and learning The outcome is a groundbreaking collection unified by a shared concern with critical perspectives of mathematics and education and of the ways they impact on practice **Scientific Papers of Ettore Majorana** Luisa Cifarelli,2020-04-28 This book presents in

full the work of the Italian theoretical physicist Ettore Majorana and explains its impacts which are still being felt It opens with a contribution by A Zichichi that considers in depth the scientific genius of Majorana This introductory chapter is followed in chronological order by the eleven scientific papers by this great scientist in most cases translated into English for the first time Each paper is accompanied by a comment from an expert in the field in question Although very few in number Majorana s papers constitute a heritage of undeniable value and extraordinary scientific meaning since they laid the foundations for research fields that remain topical today With this in mind two additional contributions on ongoing developments in these research fields are included one on neutrino physics and the other on Majorana fermions in condensed

matter The volume closes with a note on Majorana's life until his ill-fated disappearance **Civil Society and the Reform**

of Finance Charles McDaniel, Jr., 2015-07-16 Efforts to resolve the recent financial crisis have obscured a more deeply rooted financialization crisis that impacts not only the market economy but also the vital civic and moral traditions that support it This book reveals the cultural influence of finance in reshaping the foundations of American civil society and proposes a return to certain first principles of the Republic to restore the nation's economic vision This book demonstrates how funding concerns and financial incentives revalue faith traditions educational institutions non-profit organizations and even the nation's healthcare system in ways that are eroding the diversity of American culture These changes also undermine the ethical framework of both democratic government and the free market system While financial influence has diminished the value of civil society this book proposes that revitalized intermediary institutions still offer the best path forward in restoring the financial sector and more broadly enriching the American competitive ethic toward development of a more virtuous economy The book is written for an academic and professional audience offering a blueprint for the involvement of civil society with government in providing more communally integrated oversight that could contribute to a genuine democratization of finance *Daily Graphic* Ransford Tetteh, 2014-04-22 **Learning to Understand Remote Sensing**

Images Qi Wang, 2019-09-30 With the recent advances in remote sensing technologies for Earth observation many different remote sensors are collecting data with distinctive properties The obtained data are so large and complex that analyzing them manually becomes impractical or even impossible Therefore understanding remote sensing images effectively in connection with physics has been the primary concern of the remote sensing research community in recent years For this purpose machine learning is thought to be a promising technique because it can make the system learn to improve itself With this distinctive characteristic the algorithms will be more adaptive automatic and intelligent This book introduces some of the most challenging issues of machine learning in the field of remote sensing and the latest advanced technologies developed for different applications It integrates with multi-source multi-temporal multi-scale data and mainly focuses on learning to understand remote sensing images Particularly it presents many more effective techniques based on the popular concepts of deep learning and big data to reach new heights of data understanding Through reporting recent advances in the machine learning approaches towards analyzing and understanding remote sensing images this book can help readers become more familiar with knowledge frontier and foster an increased interest in this field **The Early Years Foundation Stage**

Ioanna Palaiologou, 2024-08-09 The revised fifth edition of The Early Years Foundation Stage has been fully updated to cover revised EYFS revised Development Matters and policy shifts in the sector New to the book Brand new chapters on the Rights of the Child Children's Development Learning Theories and Planning New content on diversity and inclusion throughout all chapters New and updated case studies throughout the book including international cases Additions to chapters on children's mental health climate crisis and working with children post-pandemic This market leading textbook is an essential guide for

students helping them to develop an understanding of the EYFS curriculum and encouraging a critical view of the theory and policy behind it to strengthen their practice

Starting from the Child? Teaching and Learning in the Foundation Stage, 5e Julie Fisher, 2024-04-04 What a tour de force Julie's authoritative research and practice based coherent wise arguments for child centred practice should be required reading for all primary head teachers She has been writing editions of this book for over 27 years and she's still right Helen Moylett Early Years Consultant and Writer Vice President of Early Education UK Starting From the Child has evolved and developed in the ever changing landscape of Early Years Education since it was first published almost 30 years ago and this version is perhaps more important now than ever before A must read for every Head Curriculum lead Adviser Inspector and Early Years Educator Ruth Swailes Independent Education Consultant and Curriculum Developer UK Starting from the Child is now in its fifth edition and has undergone a substantial rewrite to address significant shifts in teaching in the early years of education The book's enduring appeal is its principled yet pragmatic approach to being an early childhood educator and in this new edition the author does not shy away from addressing current sector concerns whilst holding firm to established early years principles and values The book explores the challenges faced by early childhood educators in a climate of adult insisted programmes and questions whether it is possible to continue to put the child at the centre of all that we do With her trademark passion Julie Fisher argues that it is not only possible but essential and offers strategies to do so in positive enlightened and inspiring ways Whilst maintaining the many strengths of previous editions every chapter is fully up to date with current research and thinking about early years practice and pedagogy The fifth edition includes a new chapter addressing what it means to Start from the Child a new chapter on the design of an early years curriculum a revised chapter emphasising distinctive opportunities arising from learning outdoors a revised chapter on planning for children's needs rather than curriculum delivery Starting from the Child will inspire provoke and renew all those who are committed to working in the field of early childhood education Julie Fisher is an independent Early Years Adviser author and trainer She is also Visiting Professor of Early Childhood Education at Oxford Brookes University UK She has been a headteacher of two schools a university lecturer and a local authority Lead Adviser for Early Years

The Economics of the Global Environment Graciela Chichilnisky, Armon Rezai, 2017-05-18 This is the first book combining research on the Global Environment Catastrophic Risks and Economic Theory and Policy Modern economic theory originated in the middle of the twentieth century when industrial expansion coupled with population growth led to a voracious use of natural resources and global environmental concerns It is uncontested that for the first time in recorded history humans dominate the planet changing the planet's atmosphere its bodies of water and the complex web of species that makes life on earth This radical change in circumstances led to rethinking of the foundations of human organization and in particular the industrial economy and the economic theory behind it This book brings together new approaches on multiple levels environmental sustainability requires rethinking in terms of economic theory and policy as well as the considerations

of catastrophic risk and extremal events Leading experts address questions of economic governance risk management policy decision making and distribution across time and space **Practical Steps to Digital Research** Deborah B.
