Among The Wild Chimpanzees Answers:

Chimpanzee Jinny Johnson, 2007 Introduces the social behavior feeding and reproductive habits and family life of chimpanzees both in their native habitats in the wild and in the zoo

The Chimpanzees of the Tai Forest Christophe Boesch, Hedwige Boesch-Achermann, 2000 The chimpanzees are the closest living evolutionary relatives to our own species *Homo sapiens*. As such they have long exerted a fascination over those with an interest in human evolution and what makes humans unique. Christophe Boesch and Hedwige Boesch-Achermann undertook an incredible observational study of a group of wild chimpanzees of the Tai forest in Cote D'Ivoire spending some fifteen years in the West African jungle with them. This fascinating book is the result of these years of painstaking research among the chimps. Chimpanzee behavior is documented here in all its impressive diversity and variety. Aggression, territoriality, social structure and relationships, reproductive strategies, hunting, tool use: each of these is given its own chapter along with topics such as chimp intelligence, life histories and demography. The authors take care to place their observations within the broader context of research in behavioral ecology and to compare and contrast their findings with other important work on chimpanzee groups such as that by Jane Goodall. The book concludes with a summary chapter relating the chimpanzee findings to our understanding of human evolution. Combining careful scientific observation with a store of entertaining anecdotes, this is a lively and readable book. It also succeeds in shedding light on some of the central questions around the evolutionary relationships between the primates and in particular the affinity between chimpanzees and humans. This is a major contribution to the study of the great apes and a significant addition to debates about human ape evolution. It has all the makings of a classic monograph.

The Chimpanzees of Bossou and Nimba Tetsuro Matsuzawa, Tatyana Humle, Yukimaru Sugiyama, 2011-05-06 The chimpanzees of Bossou in Guinea West Africa form a unique community which displays an exceptional array of tool use behaviors and behavioral adaptations to coexistence with humans. This community of *Pan troglodytes verus* has contributed more than three decades of data to the field of cultural primatology especially chimpanzees' flexible use of stones to crack open nuts and of perishable tools during foraging activities. The book highlights the special contribution of the long term research at Bossou and more recent studies in surrounding areas particularly in the Nimba Mountains and the forest of Di ck to our understanding of wild chimpanzees' tool use, cognitive development, lithic technology and culture. This compilation of research principally strives to uncover the complexity of the mind and behavioral flexibility of our closest living relatives. This work also reveals the necessity for ongoing efforts to conserve chimpanzees in the region. Chimpanzees have shed more light on our evolutionary origins than any other extant species in the world yet their numbers in the wild are rapidly declining. In that sense the Bossou chimpanzees and their neighbors clearly embody an invaluable cultural heritage for humanity as a whole. Readers can enjoy video clips illustrating unique behaviors of Bossou chimpanzees in an exclusive DVD accompanying the hardcover or at a dedicated website described in the softcover.

Certainty in Action Danièle Moyal-Sharrock, 2021-03-25 In Certainty in Action Danièle Moyal Sharrock describes how her encounter with Wittgenstein overturned her previous assumptions that the mind is a product of brain activity and that thought consciousness the will feelings memories knowledge and language are stored and processed in the brain by the brain She shows how Wittgenstein enables us to veer away from this brain centred view of intelligence and behaviour to a person centred view focusing on ways of acting that are both diversely embedded across forms of human life and universally embedded in a single human form of life The book traces the radical importance of action as the cohesive thread weaving through Wittgenstein's philosophy and shows how certainty intertwines with it to produce new ways of engaging in epistemology the philosophy of mind and the philosophy of language This selection of Moyal Sharrock's essays vividly illustrates some of the ways in which Wittgenstein's pioneering enactivism has impacted and can further impact not only philosophy but also neighbouring disciplines such as linguistics psychology primatology evolutionary psychology and anthropology Certainty in Action is essential reading for students and researchers of these disciplines and for anyone interested in getting a grasp of Wittgenstein's lasting genius and influence The Mind of the Chimpanzee Elizabeth V. Lonsdorf, Stephen R. Ross, Tetsuro Matsuzawa, 2010-08-15 Understanding the chimpanzee mind is akin to opening a window onto human consciousness Many of our complex cognitive processes have origins that can be seen in the way that chimpanzees think learn and behave The Mind of the Chimpanzee brings together scores of prominent scientists from around the world to share the most recent research into what goes on inside the mind of our closest living relative Intertwining a range of topics including imitation tool use face recognition culture cooperation and reconciliation with critical commentaries on conservation and welfare the collection aims to understand how chimpanzees learn think and feel so that researchers can not only gain insight into the origins of human cognition but also crystallize collective efforts to protect wild chimpanzee populations and ensure appropriate care in captive settings With a breadth of material on cognition and culture from the lab
