Fayers,David Machin,2016-01-19 The assessment of patient reported outcomes and health related quality of life continue to be rapidly evolving areas of research and this new edition reflects the development within the field from an emerging subject to one that is an essential part of the assessment of clinical trials and other clinical studies The analysis and interpretation of quality of life assessments relies on a variety of psychometric and statistical methods which are explained in this book in a non technical way The result is a practical guide that covers a wide range of methods and emphasizes the use of simple techniques that are illustrated with numerous examples with extensive chapters covering qualitative and quantitative methods and the impact of guidelines The material in this new third edition reflects current teaching methods and content widened to address continuing developments in item response theory computer adaptive testing analyses with missing data analysis of ordinal data systematic reviews and meta analysis This book is aimed at everyone involved in quality of life research and is applicable to medical and non medical statistical and non statistical readers It is of particular relevance for clinical and biomedical researchers within both the pharmaceutical industry and clinical practice *Longitudinal Research in Occupational Health Psychology* Toon Taris,2017-10-02 Occupational health psychology OHP involves the application of psychology to improving the quality of work life and to promoting and protecting the safety health and well being of employees Achieving these aims requires researchers and practitioners to possess in depth knowledge of the processes that are presumed to bring about the desired outcomes To date most studies in OHP have relied on cross sectional designs in examining these processes In such designs all variables of interest are measured simultaneously Although this has generated useful insights in how particular phenomena are associated such designs cannot be trusted when it comes to drawing causal inferences association is not causation This book therefore focuses on longitudinal research designs in OHP whereby the concepts of interest are measured several times offering much stronger evidence for causal relationships The authors focus on design issues in longitudinal research such as the number of measurements chosen and the length of the time lags between these measurements and illustrate these issues in the context of applied research on topics such as the work family interface conflict at work and employee well being By doing so this volume provides a state of the art overview of current research in OHP both in terms of its findings and methodologies This book is based on a special issue of the journal Work Stress **Relative Effectiveness of Alternative Microfinance-driven Poverty Alleviation Programs in Bangladesh** Dr. Tamgid Ahmed Chowdhury,2014-06-26 In general the effectiveness of microfinance driven poverty alleviation programs

run by Government Organizations GOs and Non Government Organizations NGOs in developing countries such as Bangladesh is assessed by repayment rates the number of beneficiaries the area coverage the amount of loans disbursed the cost of operations profitability and the financial sustainability of the projects This study argues that these methods are quite restrictive since none of them reflect the perceptions of poor people concerning the effectiveness of such projects Development agencies such as GOs and NGOs have never been compared on the basis of service delivery effectiveness a process based comparison nor have they ever been compared on the basis of their relative contribution to raising the living standards of the poor an outcome based comparison Both types of comparison are crucial to poverty reduction The main reason behind the absence of such comparisons is the unavailability of the appropriate parameters that could be used for such analysis For the process based comparison this study develops and validates a two dimensional multi item service delivery effectiveness scale through construct convergent discriminant and nomological validity The scale captures different aspects of effectiveness in the delivery of services These aspects are termed the credibility dimension and the focus towards beneficiaries dimension of service delivery in poverty alleviation programs For the output based comparison this study also develops and validates a multidimensional poverty model to compare the effectiveness of GOs and NGOs in contributing to the economic social political and cultural elements in the lives of the poor The methodology is based on 930 samples collected from 12 districts and 107 randomly chosen villages in Bangladesh during September December 2009
