The Biochar Solution Albert K. Bates, 2010-10-01 How the dirt below our feet can save us from extinction Conventional agriculture destroys our soils pollutes our water and is a major contributor to climate change What if our agricultural practices could stabilize or even reverse these trends The Biochar Solution explores the dual function of biochar as a carbon negative energy source and a potent soil builder Created by burning biomass in the absence of oxygen this material has the unique ability to hold carbon back from the atmosphere while simultaneously enhancing soil fertility Author Albert Bates traces the evolution of this extraordinary substance from the ancient black soils of the Amazon to its reappearance as a modern carbon sequestration strategy Combining practical techniques for the production and use of biochar with an overview of the development and future of carbon farming The Biochar Solution describes how a new agricultural revolution can reduce net greenhouse gas emissions to below zero while increasing world food reserves and creating energy from biomass wastes Biochar and carbon farming can Reduce fossil fuels inputs into our food system Bring new life to desert landscapes Filter and purify drinking water Help build carbon negative homes communities and nations Biochar is not without dangers if unregulated and it is not a panacea but if it fulfills its

promise of taking us back from the brink of irreversible climate change it may well be the most important discovery in human history
