Researching Creative Learning Pat Thomson, Julian Sefton-Green, 2010-11-05 It is a common ambition in society and government to make young people more creative These aspirations are motivated by two key concerns to make experience at school more exciting relevant challenging and dynamic

and to ensure that young people are able and fit to leave education and contribute to the creative economy that will underpin growth in the twenty first century Transforming these common aspirations into informed practice is not easy It can mean making many changes turning classrooms into more exciting experiences introducing more thoughtful challenges into the curriculum making teachers into different kinds of instructors finding more authentic assessment processes putting young people s voices at the heart of learning There are programmes projects and initiatives that have consistently attempted to offer such change and transformation The UK programme Creative Partnerships is the largest of these but there are significant initiatives in many other parts of the world today including France Norway Canada and the United States This book not only draws on this body of expertise but also consolidates it making it the first methodological text exploring creativity Creative teaching and learning is often used as a site for research and action research and this volume is intended to act as a textbook for this range of courses and initiatives The book will be a key text for research in creative teaching and learning and is specifically directed at ITE CPD Masters and doctoral students

Theorizing Images Žarko Paić,2016-04-26 This book uncovers an underlying dispute over the role images play in contemporary society and consequently over their values and purposes Two decades after the concepts of the pictorial and the iconic turn changed our vernacular involvement with regard to images it has become clear that it was not only a newly discovered social political or sexual construction of the visual field that brought turbulence into disciplinary knowledge but that images have their own pictorial logic with powers exceeding those that are purely iconic or visually discernible Instead of underscoring previously

defined concepts of the picture the contributors to this book view visual studies and Bildwissenschaft merely as a place for the theory of images making a case for the hotly debated topic of their powers and weaknesses on the one hand and of their respective theories on the other Therefore as the title indicates this book theorizes images but it does not present a theory of images because visual studies cannot lead to a unified theory of images unless a unified ontology of images can be agreed upon first Although that would be a different task altogether all the contributions in this book in different ways and at different paces by theorizing images in their aesthetic historical media and technological guises pave the way for the future of visual culture and for the image science that will make this future more comprehensible

Critical Security Methods

Claudia Aradau, Jef Huysmans, Andrew Neal, Nadine Voelkner, 2014-08-13 Critical Security Methods offers a new approach to research methods in critical security studies It argues that methods are not simply tools to bridge the gap between security theory and security practice Rather to practise methods critically means engaging in a more free and experimental interplay between theory methods and practice This recognises that the security practices we research are often methods in their own right as forms of surveillance data mining visualisation and so on and that our own research methods are themselves practices that intervene and interfere in those sites of security and insecurity Against the familiar methodological language of rigour detachment and procedural consistency Critical Security Methods reclaims the idea of method as experiment The chapters offer a series of methodological experimentations that assemble concepts theory and empirical cases into new frameworks for critical security research They show how critical engagement and methodological innovation can be practiced as interventions into diverse instances of insecurity and securitisation including airports drug trafficking peasant struggles biometrics and police kettling The book will be a valuable resource for students and researchers in critical security studies politics and international relations

Intermedial Arts

Leena Eilittä, Liliane Louvel, 2011-08-08 The essays in this collection which were written by European and North American specialists position intermediality as a praxis of interpretative analysis in order to show how intermediality challenges our notion of art The writers examine the various intermedial relations between the arts which may take the form of reference to another form of art a combination of two or more forms of art or a generic transformation from one form of art to another In such cases an intermedial approach helps us to grasp the changing relationship between the arts which affects our reception of experience Intermediality has profoundly changed our understanding of interdisciplinary relations formerly examined in the field of interart studies By introducing a medial aspect intermediality has succeeded in making a leap from past practices of artistic interrelatedness to our contemporary medial age in which literature along with other arts may be understood as a medium This ambitious undertaking has contributed to the liberation of literature and other arts from an isolated position in the established scholarly landscape with its clear cut borderlines between disciplines The essays in this collection are a valuable contribution to this on going discussion about the relationships between the arts The variety of essays published in this collection makes it

an excellent introduction to academics and university students in such disciplines as literature music theatre art history and media studies Due to its clarity which does not sacrifice philosophical depth concerning the role of intermedial studies for several forms of art this book will also be of interest to academics and students who are currently working at advanced level art schools

Visual Environmental Communication Anders Hansen, David Machin, 2016-03-17 In 2008 the editors published a well cited journal paper arguing that while scholarly work on media representations of environmental issues had made substantial progress in textual analysis there had been much less work on visual representations This is surprising given the increasingly visual nature of media and communication and in light of emerging evidence that the environment is visualized through the use of increasingly symbolic and iconic images Addressing these matters this volume marks out the present state of the field and contains chapters that represent fresh and exciting high quality scholarly work now emerging on visual environmental communication These include a range of fascinating and often alarming topics which draw on a variety of methods and forms of visual communication The book demonstrates that research needs to think much more widely about what we mean by the visual which plays a massive yet under researched role in the politics and ideology of public understanding and misunderstanding of and the environment and environmental problems The book is of relevance to students and researchers in media and communication studies cultural studies film and visual studies geography sociology politics and other disciplines with an interest in the politics of visual environmental communication This book was published as a special issue of *Environmental Communication A Journal of Nature and Culture*

Theorising Drones in Visual Culture Elisa Serafinelli, 2024-11-30 This book investigates whether and how drone technology is changing how we see and experience our visual cultures Knowing more about these visuals is essential to understand how our visual experience of the world is changing and the creative potential these new technological implementations may afford To do so the book analyses drone visuals exploring their aesthetics and meanings the context where they circulate and how they are perceived The book will therefore be of interest to students and researchers of digital sociology digital media mobile media visual studies media and communication and journalism

Mapping Minds Monika Raesch, 2020-04-14 This volume features a select group of essays presented at the 4th Global Conference on Visual Literacies Celebrating an interdisciplinary approach this volume features work ranging among others from photography and video production studies to graffiti and film analysis with a variety of theoretical approaches
