The Selected Papers of Margaret Sanger, Volume 4 Margaret Sanger, 2016-10-01

When Margaret Sanger returned to Europe in 1920, World War I had altered the social landscape as dramatically as it had the map of Europe. Population concerns, sexuality, venereal disease, and contraceptive use had entered public discussion, and Sanger's birth control message found receptive audiences around the world. This volume focuses on Sanger from her groundbreaking overseas advocacy during the interwar years through her postwar role in creating the International Planned Parenthood Federation. The documents reconstruct Sanger's dramatic birth control advocacy tours through early 1920s Germany, Japan, and China in the midst of significant government and religious opposition to her ideas. They also trace her tireless efforts to build a global movement through international conferences and tours, letters, journal entries, writings, and other records that reveal Sanger's contentious dealings with other activists, her correspondence with the likes of Albert Einstein and Eleanor Roosevelt, and Sanger's own dramatic evolution from gritty grassroots activist to postwar power broker and diplomat. A powerful documentary history of a transformative twentieth-century figure, *The Selected Papers of Margaret Sanger, Volume 4* is a primer for the debates on individual choice, sex education, and planned parenthood that remain all too pertinent in our own time.

Archibald Liversidge, FRS Roy MacLeod, 2009-12-14

When Archibald Liversidge first arrived at Sydney University in 1872 as reader in geology and assistant in the laboratory, he had about ten students and two rooms in the main building. In 1874 he became professor of geology and mineralogy, and by 1879 he had persuaded the senate to open a faculty of science. He became its first dean in 1882. Liversidge also played a major role in the setting up of the Australasian Association for the Advancement of Science, which held its first congress in 1888. For anyone interested in Archibald Liversidge, his contribution to crystallography, mineral chemistry, chemical geology, strategic minerals policy, and a wider field of colonial science.
