Strategic Human Capital Development in Asia Richard R. Smith, 2022-06-23 Asia continues to ascend as an economic powerhouse and a strategic priority for business leaders around the world, yet there is often limited understanding of the human capital systems that fuel the economic engines of the region. This book brings together the perspectives from economics, sociology and management to highlight the business implications of human capital development in Asia. This book provides new insights on human capital systems in Asia by considering the country context through a Human Capital Ecosystem framework. Applying this framework, constituent outline and comparable points across each of the countries in Asia. Smith translates national policies into insights on the drivers, challenges and opportunities in individual countries. Each chapter also draws out clear business and HR implications based on the above framework and analysis. While Asia continues to be a critical priority for businesses, there is limited understanding on how to manage and navigate the human capital systems in each of the region's diverse countries. This book will serve as a helpful reference for managers or supplemental study guide for graduate students working to understand how to execute business strategy in major economies of Asia. **2013 Catalog of Federal Domestic Assistance**, 2013 Identifies and describes specific government assistance opportunities such as loans, grants, counseling and procurement contracts available under many agencies and programs. **Grading for Growth** David Clark, Robert Talbert, 2023-07-03 Are you satisfied with your current and traditional grading system? Does it accurately reflect your students' learning and progress? Can it be gamed? Does it lead to grade grubbing and friction with your students? The authors of this book, two professors of mathematics with input from colleagues across disciplines and institutions, offer readers a

fundamentally more effective and authentic approach to grading that they have implemented for over a decade Recognizing that traditional grading penalizes students in the learning process by depriving them of the formative feedback that is fundamental to improvement the authors offer alternative strategies that encourage revision and growth Alternative grading is concerned with students eventual level of understanding This leads to big changes Students take time to review past failures and learn from them Conversations shift from why did I lose a point for this to productive discussions of content and process Alternative grading can be used successfully at any level in any situation and any discipline in classes that range from seminars to large multi section lectures This book offers a comprehensive introduction to alternative grading beginning with a framework and rationale for implementation and evidence of its effectiveness The heart of the book includes detailed examples including variations on Standards Based Grading Specifications Grading and ungrading of how alternative grading practices are used in all kinds of classroom environments disciplines and institutions with a focus on first hand accounts by faculty who share their practices and experience The book includes a workbook chapter that takes readers through a step by step process for building a prototype of their own alternatively graded class and ends with concrete practical time tested advice for new practitioners The underlying principles of alternative grading involve Evaluating student work using clearly defined and context appropriate content standards Giving students helpful actionable feedback Summarizing the feedback with marks that indicate progress rather than arbitrary numbers Allowing students to revise without penalty using the feedback they receive until the standards are met or exceeded This book is intended for faculty interested in exploring alternative forms of learning assessment as well as those currently using alternative grading systems who are looking for ideas and options to refine practice

Bridging Theory and Practices for Educational Sciences Abdülkadir Kabadayı,2021-09-15 Bridging Theory and Practices for Educational Sciences

Serving Library Users from Asia John Hickok,2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US While books on serving other target groups in libraries have

been published e.g. disabled Latino seniors etc. few books on serving library users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters each on 24 specific Asian countries/cultures of East Southeast and South Asia with a wealth of resources for understanding interacting with/outreaching to and serving library users of each culture. Resources include cultural guides both print and online, language helps with sample library vocabulary, Asian booksellers nationwide, cultural groups, professional literature and more. Resources and suggestions are given for all three types of libraries: public, school and academic, making this book valuable for all librarians. The demographics of each Asian culture, numbers and distribution plus history of immigration and international student enrollment is also featured. As a bonus, each chapter spotlights a US public school and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems and more of public school and academic libraries are all discussed with detailed documentation. Country conditions influencing libraries and library use are also described: literacy levels, reading cultures, languages and writing systems, educational systems and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.

Handbook of Research on Professional Development for Quality Teaching and Learning Petty, Teresa, Good, Amy, Putman, S. Michael, 2016-06-16. As educational standards continue to transform, it has become essential for educators and pre-service teachers to receive the support and training necessary to effectively instruct their students and meet societal expectations. However, there is not a clear consensus on what constitutes teacher effectiveness and quality within the education realm. The Handbook of Research on Professional Development for Quality Teaching and Learning provides theoretical perspectives and empirical research on educator preparation and methods for enhancing the teaching process. Focusing on teacher effectiveness and support provided to current and pre-service educators, this publication is a comprehensive reference source for practitioners, researchers, policy makers, graduate students and university faculty.

Not Eleven Languages Leketi Makalela, 2022-07-05. Dynamic language practices of African multilingual speakers have not been cogently described in a book-length manuscript. This book challenges assumptions that led to South Africa's 11 official languages and makes a case for mutual inter-comprehensibility. Students, teachers and

scholars in sociolinguistics multilingualism translanguaging and teacher education will find this book thought provoking
