

Removing the headlamps Audi A4

There are four screws holding each headlamp in place, two are on top in plain view, remove these. The other two are back and down behind the headlamps. To get to the screws in the back you will need to remove the plastic cover over the power steering reservoir on the drivers side and on the passenger side you will have to take off the air intake tube which runs from the grill to the intake box. There are only two Phillips screws holding this intake tube in place. Once these pieces are out you should be able to see the back screws. You DO NOT need to remove the two back screws just loosen them a few turns. (Fig 1)

The third and fourth screw are a little harder to find, but shouldn't be too bad to get at. Just loosen these about 2 turns a piece and the entire assembly should become loose. Here's where to find them:
