Hall,2005 This major research study provides a fresh critical look at the way automobile electronics are and should be built Written by Silicon Valley pioneer John Hall this book is based on his nearly 40 years of experience in developing and producing semiconductors for the automobile industry and other customers Highly readable and comprehensible for even beginning students of electronics and semiconductor design this volume provides an in depth explanation of the factors to be considered when building vehicle systems Starting with a concise history of vehicle electronics Hall walks the reader through the environmental conditions faced by these systems and the variety of failure mechanisms that can occur Basic and advanced semiconductor issues raised by vehicle implementation are then discussed in detail A wide range of issues confronting designers from over marketing of risky features to time and cost constraints are explained Complex electronic modules from many different manufacturers are examined and discussed as real world case studies of good and bad design techniques Hall concludes by providing design recommendations that will allow vehicle electronics system developers to build much tougher devices at little or no incremental production cost This book is the first major work to focus on key issues emerging as major causes of safety and performance problems Vehicle makers increasingly seek market advantages by providing ever more capable electronics in their products While these features add much value to vehicles they fail in ways that are beyond the experience and comprehension of most technicians and accident investigators By combining decades of design experience and innovation with extensive research Hall has produced unique insights and explanations so engineers can prevent most or perhaps all of these problems John Hall is one of Silicon Valley s most prolific independent pioneers and inventors He founded Union Carbide s semi conductor operation in 1962 He is a founder of Interstil and Micro Power Systems He is the inventor of the first electronic watch first LCD digital watch first CMOS liquid crystal display hand held calculator color autofocus cameras among many successful commercial products He has worked for many American and foreign automakers on specific projects such as integrated two way radios and seat belt interlocks He is working with DoD on hardening electronics systems against non nuclear events **Illustrated Catalogue of Books, Standard and Holiday** McClurg, Firm, Booksellers, Chicago,1907 *Side Impact, Rear Impact and Rollover* 2006 ,2006 **User Unfriendly** Joseph J. Corn,2011-11-01 We ve all been there Seduced by the sleek designs and smart capabilities of the newest gadgets we end up stumped by their complicated set up instructions and exasperating error messages In this fascinating history Joseph J Corn maps two centuries of consumer frustration and struggle with personal

technologies Aggravation with the new machines people adopt and live with is as old as the industrial revolution Clocks sewing machines cameras lawn mowers bicycles electric lights cars and computers all can empower and exhilarate but they can also exact a form of servitude Adopters puzzle over which type and model to buy and then how to operate the device diagnose its troubles and meet its insatiable appetite for accessories replacement parts or upgrades It intrigues Corn that we put up with the frustrations our technology thrusts upon us battling with the unfamiliar and climbing the steep learning curves It is this ongoing struggle more than the uses to which we ultimately put our machines that animates this thought provoking study Having extensively researched owner s manuals computer user group newsletters and how to literature Corn brings a fresh consumer oriented approach to the history of technology User Unfriendly will be valuable to historians of technology students of American culture and anyone interested in our modern dependence on machines and gadgets
