Perry, 2020-10-26 For many years China and India have been powerfully shaped by both transnational and subnational circulatory forces This edited volume explores these local and global influences as they play out in the contemporary era The analysis focuses on four intersecting topics labor relations legal reform and rights protest public goods provision and transnational migration and investment The eight substantive chapters and introduction share a common perspective in arguing that distinctions in regime type democracy versus dictatorship alone offer little insight into critical differences and similarities between these Asian giants in terms of either policies or performance A wide variety of subnational and transnational actors from municipal governments to international organizations and from local NGO activists

to a far flung diaspora have been and will continue to be decisive The authors approach China and India through a strategy of convergent comparison in which they investigate temporal and spatial parallels at various critical junctures at various levels of the political system and both inside and outside the territorial confines of the nation state The intensified globalization of recent decades only heightens the need to view state initiatives against such a wider canvas China 1949 Graham Hutchings,2021-01-14 Excellent The Economist A gripping account South China Morning Post Well worth reading The Morning Star A persuasive and readable narrative History Today Elegantly written The Tablet An excellent study The Chartist Engaging Asia Times The events of 1949 in China reverberated across the world and throughout the rest of the century That tumultuous year saw the dramatic collapse of Chiang Kai shek s pro Western Nationalist government overthrown by Mao Zedong and his communist armies and the foundation of the People s Republic of China China 1949 follows the huge military forces that tramped across the country the exile of once powerful leaders and the alarm of the foreign powers watching on The well known figures of the Revolution are all here But so are lesser known military and political leaders along with a host of ordinary Chinese citizens and foreigners caught in the maelstrom They include the often neglected but crucial role played by the Guangxi faction within Chiang s own regime the fate of a country woman who fled her village carrying her baby to avoid the fighting a prominent Shanghai business man and a schoolboy from Nanyang ordered by his teachers to trek south with his classmates in search of safety Shadowing both the leaders and the people of China in 1949 Hutchings reveals the lived experiences aftermath and consequences of this pivotal year one in which careers were made and ruined and popular hopes for a new China contrasted with fears that it would change the country forever The legacy of 1949 still resonates today as the founding myth source of national identity and root of the political behaviour of modern China Graham Hutchings has written a vivid gripping account of the year in which China abruptly changed course and pulled the rest of world history along with it Economic Policy Making In China (1949-2016) Pieter Bottelier,2018-04-09 This book explores the key ideas and the key people who were responsible for the development of China s economy from 1949 through 2016 It discusses how economic policy evolved how economic policy was formulated and how the role of economists in decision making evolved It considers the interplay between ideological and practical questions provides biographical details of key economists and includes a clear annotated chronology of events The book is especially valuable because the author as a senior World Bank official was a close observer of the situation and to some extent a key participant *Klinikten Pratiğē Kardioloji* Deniz DEMİRCİ,Duygu ERSAN DEMİRCİ,2022-04-29 **Advances in Wireless Sensor Networks** Limin Sun,Huadong Ma,Feng Hong,2014-03-04 This book constitutes the refereed proceedings of the 7th China Conference of Wireless Sensor Networks held in Qingdao China in October 2013 The 35 revised full papers were carefully reviewed and selected from 191 submissions The papers cover a wide range of topics in the wireless sensor network fields like node systems infrastructures communication protocols data management **The World Turned Upside Down**

Yang Jisheng, 2021-01-19 Yang Jisheng's *The World Turned Upside Down* is the definitive history of the Cultural Revolution in withering and heartbreaking detail. As a major political event and a crucial turning point in the history of the People's Republic of China, the Great Proletarian Cultural Revolution 1966-1976 marked the zenith as well as the nadir of Mao Zedong's ultra-leftist politics. Reacting in part to the Soviet Union's revisionism that he regarded as a threat to the future of socialism, Mao mobilized the masses in a battle against what he called bourgeois forces within the Chinese Communist Party (CCP). This ten-year-long class struggle on a massive scale devastated traditional Chinese culture as well as the nation's economy. Following his groundbreaking and award-winning history of the Great Famine, Tombstone, Yang Jisheng here presents the only history of the Cultural Revolution by an independent scholar based in mainland China and makes a crucial contribution to understanding those years' lasting influence today. *The World Turned Upside Down* puts every political incident, major and minor, of those ten years under extraordinary and withering scrutiny and arrives in English at a moment when contemporary Chinese governance is leaning once more toward a highly centralized power structure and Mao-style cult of personality.

Artificial Intelligence in Data and Big Data Processing Ngoc Hoang Thanh Dang, Yu-Dong Zhang, João Manuel R. S. Tavares, Bo-Hao Chen, 2022-05-18 The book presents studies related to artificial intelligence (AI) and its applications to process and analyze data and big data to create machines or software that can better understand business behavior, industry activities, and human health. The studies were presented at The 2021 International Conference on Artificial Intelligence and Big Data in Digital Era (ICABDE 2021) which was held in Ho Chi Minh City, Vietnam, during December 18-19, 2021. The studies are pointing toward the famous slogan in technology: "Make everything smarter," i.e., creating machines that can understand and can communicate with humans and they must act like humans in different aspects such as vision, communication, thinking, feeling, and acting. A computer would deserve to be called intelligent if it could deceive a human into believing that it was human. Alan Turing.

China After Mao Frank Dikötter, 2022-11-15 A blow-by-blow account. An important corrective to the conventional view of China's rise. Financial Times. From internationally renowned historian Frank Dikötter, winner of the Samuel Johnson Prize, a myth-shattering history of China from the death of Chairman Mao to Xi Jinping. Through decades of direct experience of the People's Republic combined with extraordinary access to hundreds of hitherto unseen documents in communist party archives, the author of *The People's Trilogy* offers a riveting account of China's rise from the disaster of the Cultural Revolution. He takes us inside the country's unprecedented four-decade economic transformation from rural villages to industrial metropolises and elite party conclaves that vaulted the nation from 126th largest economy in the world to second largest. A historian at the pinnacle of his field, Dikötter challenges much of what we think we know about how this happened. Casting aside the image of a society marching unwaveringly toward growth in lockstep to the beat of the party drum, he recounts instead a fascinating tale of contradictions, illusions, and palace intrigue of disasters narrowly averted, shadow banking, anti-corruption purges, and extreme state wealth existing alongside everyday poverty. He examines China's

navigation of the 2008 financial crash its increasing hostility towards perceived Western interference and its development into a thoroughly entrenched dictatorship with a sprawling security apparatus and the most sophisticated surveillance system in the world As this magisterial book makes clear the communist party's goal was never to join the democratic world but to resist it and ultimately defeat it **Chicago Tribune**, 1978 **2021 International Conference on Big Data Analytics for Cyber-Physical System in Smart City** Mohammed Atiquzzaman, Neil Yen, Zheng Xu, 2022-01-01 This book gathers a selection of peer reviewed papers presented at the third Big Data Analytics for Cyber Physical System in Smart City BDCPS 2021 conference held in Shanghai China on Nov 27 2021 The contributions prepared by an international team of scientists and engineers cover the latest advances made in the field of machine learning and big data analytics methods and approaches for the data driven co design of communication computing and control for smart cities Given its scope it offers a valuable resource for all researchers and professionals interested in big data smart cities and cyber physical systems
