Case Studies of Minority Student Placement in Special Education Beth Harry, Janette Klingner, Elizabeth Cramer, 2007. This book features vivid case studies that bring to life real children, school personnel and family members from the bestselling book *Why Are So Many Minority Students in Special Education*. Once again addressing the disproportionate placement of minority students in special education programs, this new book includes the voices and perspectives of all stakeholders to show the tremendous complexity of the issues and the dilemmas faced by professionals, family members and children. Challenging questions and scenarios are offered at the end of each case study to provide thoughtful follow-up activities and topics for further study. This collection of cases can be used on its own or as a companion to the main volume in elementary and special education courses and professional development workshops. This book provides a thorough and detailed description of the multiple factors that combine to provide inequitable educational opportunities for minority students living in poverty; the authors do not shy away from discussion of racism on the individual and institutional levels they engage in this discussion in a refreshingly detailed and nuanced way. *TC Record*. It is the best casebook on special education that I have seen. Velma L. Cobb, Vice President of Education and Youth Development, National Urban League.

Taking on a Learning Disability Erin McCloskey, 2012-08-01. In the United States approximately 2.5 million students are diagnosed as having a learning disability and the majority of those children are placed in special education because of an inability to read as expected. As a result of this diagnosis, these children may be placed in special education classrooms, classrooms that are separate from the mainstream population. For children with learning disabilities, there is likely no place other than in school where a student's inability to read as expected leads to this separation from his/her peers. Once school is over, these children play alongside the kids in their neighborhoods, participate in sports teams and attend community activities. This book looks at the impact of being labeled as learning disabled and separated from peers in school through the eyes of Samson, a middle school student described both as learning disabled and a non-reader. This qualitative case study explores how Samson, his family, his teachers and this researcher make sense of special education and the complexities of learning to read as an adolescent. Throughout this book, there is a contrasting of the laws and procedures designed to guide special education with the actual experiences of those impacted by these laws and procedures. Through the three years that Samson was in middle

school this book investigates his perspective on his classes his interpretation of what it means to be a student in special education and the process by which he learns to read How disability gets created contested and discussed is highlighted through the many contexts that allow disability to be recognized and to fade into the background **Autism** Robin L.
