Sustainability in Food and Water Kensuke Fukushi,K M Hassan,R Honda,Akimasa Sumi,2010-09-02

Food and water security issues are regarded as sine qua non if a society wants to promote health, peace and prosperity. People who are well fed are also people with the means to change their situation. However, this is still an immense challenge for Asia, especially in the global environmental perspective in the 21st century. People around the globe will be facing a combination of problems concerning both environmental as well as social changes; therefore, the policy for future food and water security has to be upgraded in an integrated and holistic way. The need to put into perspective the ever mounting body of new information on environmental security of food and water issues in Asia beyond the boundaries of separate disciplines provided the impetus for the development of this book. It is a compilation of selected articles from two international symposiums entitled Food and Water Sustainability in China 2007 and Food and Water Sustainability in Asia 2008 which were held in Macau, China. Eminent scientists/researchers from different parts of Asia spoke at the symposium on topics such as the challenges in sustainable water resource management, future projection of development strategies for series increased yield of food grains by rainwater management in arid lands, multi functional role of rice paddy area for food and water sustainability, the impact of biofuel production on food security, reclaimed wastewater for sustainable urban water use, heavy metal removal from contaminated soil and water, and adaptation strategies to cope with the climate change issues for food and water.

*Tribology and Dynamics of Engine and Powertrain* Homer Rahnejat, 2010-09-30 Tribology, the science of friction, wear and lubrication, is one of the cornerstones of engineering's quest for efficiency and conservation of resources. Tribology and dynamics of engine and powertrain fundamentals, applications and future trends provides an authoritative and comprehensive overview of the disciplines of dynamics and tribology using a multi physics and multi scale approach to improve automotive engine and powertrain technology. Part one reviews the fundamental aspects of the physics of motion, particularly the multi body approach to multi physics multi scale problem solving in tribology. Fundamental issues in tribology are then described in detail from surface phenomena in thin film tribology to impact dynamics, fluid film and elastohydrodynamic lubrication, means of measurement and evaluation. These chapters provide an understanding of the theoretical foundation for Part II which includes many aspects of the physics of motion at a multitude of interaction scales from large displacement dynamics to noise and vibration tribology, all of which affect engines and powertrains. Many chapters are contributed by well established practitioners disseminating their valuable knowledge and expertise on specific engine and powertrain sub systems. These include overviews of engine and powertrain issues, engine bearings, piston systems, valve

trains transmission and many aspects of drivetrain systems The final part of the book considers the emerging areas of microengines and gears as well as nano scale surface engineering With its distinguished editor and international team of academic and industry contributors Tribology and dynamics of engine and powertrain is a standard work for automotive engineers and all those researching NVH and tribological issues in engineering Reviews fundamental aspects of physics in motion specifically the multi body approach to multi physics Describes essential issues in tribology from surface phenomena in thin film tribology to impact dynamics Examines specific engine and powertrain sub systems including engine bearings piston systems and value trains

**Dad's Best Memories and Recollections** Charles J. Humber, 2016-01-20 DAD S BEST MEMORIES AND RECOLLECTIONS is Chazzz Humber s epithaph casting a very long and sentimental shadow across North America and beyond This 230 page volume is his granite monument well polished It lavishly records 125 of his best memories over a life span of nearly eighty years The vignettes are serenaded with more than 400 illustrations Those discovering this volume likely will find themselves wanting to record in their own sunset years their personal memories and recollections And when they do they are apt to recall what it was like to live in their fluctuating world dominated by a variety of personalities and cascading events Mr Humber vividly describes what it was like in 1945 to travel in a 1930 Model A Ford from Toronto to Boston With lively enthusiasm he reports what it was like to live in post World War II Boston to cook a lobster for a former President of the United States or to sell a pair of elevator shoes to one of Hollywood s shortest celebrities or to shine the shoes of a Derby hatted father of a future President of the United States It is not a remarkable achievement to reflect to recall or to have memories that are treasured But to tell them with literary aplomb to recall the events that happened nearly seventy five years ago with utmost clarity is definitely an admirable achievement and should be cherished not only by the kin who follow Mr Humber but by those who might like to imitate what he has monumentally achieved in Dad s Best Memories and Recollections     *Lemon-Aid Used Cars and Trucks 2012-2013* Phil Edmonston, 2012-05-19 A guide to buying a used car or minivan features information on the strengths and weaknesses of each model a safety summary recalls warranties and service tips
