What are the building blocks of life?

## Why?

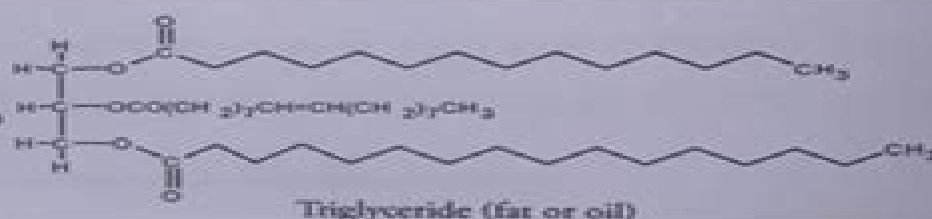

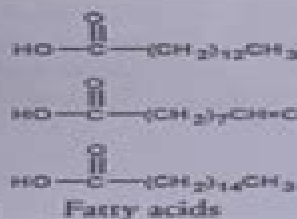

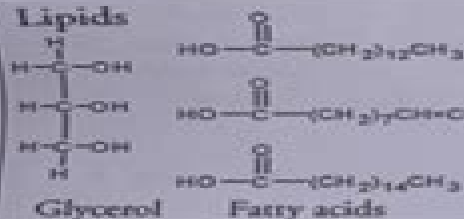

From the smallest single-celled organism to the tallest tree, all life depends on the properties and reactions of four classes of **organic** (carbon-based) compounds—**carbohydrates**, **lipids**, **proteins**, and **nucleic acids**. These organic molecules are the building blocks of all living things, and are responsible for most of the structure and functions of the body, including energy storage, insulation, growth, repair, communication, and transfer of hereditary information. Simple organic molecules can be joined together to form all the essential biological molecules needed for life.

## Model 1 – Molecules of Life

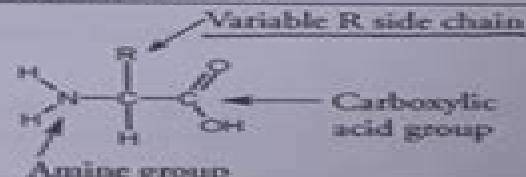

### Carbohydrates (monosaccharides)

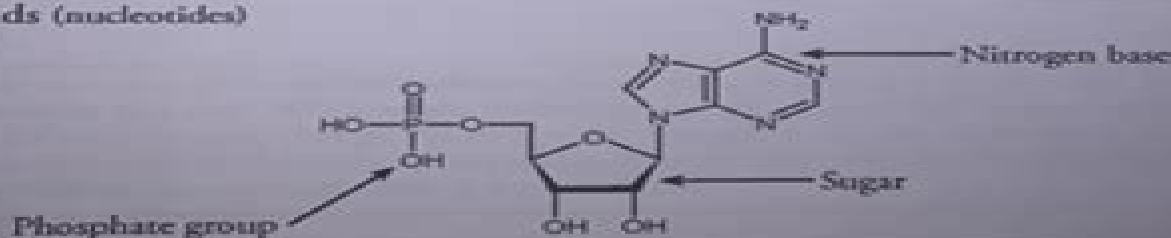

### Lipids

### Proteins (amino acids)

### Nucleic acids (nucleotides)

understand my favorite passages so much better because I understand more how it all connects We see the Lord Jesus everywhere in the Bible Jody Oklahoma Having grown up in church traveled and taught in different churches I have taught from several different Sunday School curriculums The Biblical Path of Life has by far been the most in depth and chronologically on track curriculum I have learned and taught from There is far more knowledge in the material per lesson than any other curriculum I have used The whole curriculum is Christ centered a program of study and simple to use Designed for the teacher and student to absorb and learn from and is extremely recommended Justin Oklahoma You will find in this series of Biblical studies the most conservative literal deeply foundational truths of the Holy Bible Our church Rehoboth Baptist of Claremore OK has used The Biblical Path of Life studies for the past twelve years for our children and for our Adults for the past seven years bringing our Bible Study program into a Family Bible study for the whole church I highly recommend this study to bring your Bible Study program together as a family in unity Wayne Keely Pastor
