Activities Steven D. Silver, 2012-12-06 It is difficult to overstate the importance of personal consumption both to individual
consumers and to the economy While consumers are recognized as valuing market goods and services for the activities they
can construct from them in the frameworks of several disciplines consequences of the characteristics of goods and services
they use in these activities have not been well studied In the discourse to follow I will contrast knowledge yielding and
conventional goods and services as factors in the construction of activities that consumers engage in when they are not in the
workplace Consumers will be seen as deciding on non-work activities and the inputs to these activities according to their
objectives and the values and cumulated skills they hold I will suggest that knowledge content in these activities can be
efficient for consumer objectives and also have important externalities through its effect on productivity at work and
economic growth The exposition will seek to elaborate these points and contribute to multi-disciplinary dialogue on
consumption It takes as its starting point the contention that consumption is simultaneously an economic and social
psychological process and that integration of content can contribute to explanation **Collections**, 2015 **(Grade 7)**
