Mismeasuring Schools' Vital Signs Steve Rees, Jill Wynns, 2022-09-29 This book helps school and district leaders avoid the pitfalls that await those making sense of their school's data. Whether you're interpreting achievement gaps, graduation rates, or test results, you're at risk of reaching a mistaken judgment. By learning about common errors and how they're made, you'll be ready to choose safer, surer paths to making better sense of the wealth of data in your school or district. The authors help educators build better evidence, see conclusions more clearly, and explain the data more persuasively. Special features include Questions to Spark Discussion in each chapter, encourage school site, district leaders, and board trustees to apply each chapter's content to their own situations. Data visualizations, together with the authors' interpretations, will help you learn how to do visual analysis and reach the right conclusions. Practical tips provide clear guidance. Supplemental resources can be found at the book's website, k12measures.com, including interactive data visualizations and analytic exercises to help you learn a concept by doing.

Snapshots of the Mind Gary A. Klein, 2022-10-18 How people make decisions, size up situations, spot anomalies, and anticipate problems in real-world settings. Gary Klein, author of the bestselling *Sources of Power*, is the cognitive psychologist who discovered how people actually make decisions, particularly under time pressure and uncertainty. In *Snapshots of the Mind*, he offers a set of short essays, snapshots of different aspects of cognitive functioning in real-world settings that will help us learn to recognize the cognitive processes that underlie and drive performance. In these essays, Klein provides practical tools for escaping fixation on initial hunches and learning to detect the ways that people make decisions, size up situations, spot anomalies, and anticipate problems. *Snapshots of the Mind* grows out of the Naturalistic Decision Making movement, which studies how decision makers handle uncertainty and complexity in high-stakes situations. In the essays, Klein examines how people make tough choices and assessments in the real world, discussing such topics as training, information technology, teamwork, expertise, and insights. Debunking the idea that artificial intelligence will soon take over human decision making, he argues instead for machines that make us smarter and expand our expertise. He describes his Recognition Primed Decision (RPD) model, which has been incorporated into Army doctrine and was one of the inspirations for Malcolm Gladwell's *Blink*. *Snapshots of the Mind* offers fresh takes on such topics as confirmation bias, anomaly detection, intuition, anticipatory thinking, and perspective taking. Readers come away attuned to the primary aspects of expert cognition: the mindsets, mental models, and perceptual sensitivity.

Test Talk! Cheli Cerra, Ruth Jacoby, 2007-02-26 *Test Talk* provides a wealth of practical advice on how to deal with common issues that may arise with student testing from kindergarten through high school. Authors Cheli Cerra and Ruth Jacoby identify 50 snapshots of situations that parents typically face when dealing with testing and then give you practical tools to help your children succeed, including helpful checklists, worksheets, and progress reports.
