

■ The end of the Japanese lead seems of no moment. While it was true that Japanese motorcycles were coming through with easily improved features and responses, new American and new regulations threatened to make the bikes impossible to ride if not downright undesirable. The future appeared to hold nothing but the open, gaps and the occasional buckline from a flock of would-be wonderful engines tossed out and strangled by regulations. All mechanical forms, cuts, corners, curves, etc. go through phases of development where progress is made slowly as people grope around for solutions, then faster as new ideas are piled out on the table, finally culminating in a phase where most of the problems are recognized and style-conscious techniques. It seemed that motorcycles were to be denied this peak of mechanical development just when they had it in their collective grasp.

The Suzuki GS850, introduced in 1978, was a good example. There was an exemplary timing machine with compression forks, excellent brakes, adjustable shock damping and a remarkably sharp shaft drive that didn't climb and dive all over itself. The transmission didn't work very well—it was stiff and rather loud—but the rest of the bike was pretty good. And it was in 1979, a bike of no more bulk than some 750s, but with a little more power for fully equipped two-up touring.

Unfortunately, nobody liked riding the bike very much. It was noisy, crawling over on the highway, but ground over the cobble-blended surface of the engine made short trips less than a joy. It took a full 10 min. of playing the clock against the engine to keep the thing running right, and by that time you had arrived at your destination, with a similar engine trip to look forward to. From where we're, running was not perfect. The carbs had a vague, unpredictable feel when obviously settings were changed. We noted that other companies had to grapple with the same compression laws in Suzuki, and some had been able to make their own models run better.

A few years have passed since that first test, and things have changed. The entire motorcycle industry seems to have moved out its carb and throttle response file to the point where a new bike with running or warm-up problems is the exception rather than the rule. And few Japanese firms have responded better to the fine touch of refinement than Suzuki's GS850. The 1982 GS model is this test run about as well as anything on the road.
