**The Fisher Body Craftsman's Guild** John L. Jacobus, 2015-05-07 The Fisher Body Craftsman's Guild was a national auto design competition sponsored by the Fisher Body Division of General Motors. This competition was for teenagers to compete for college scholarships by designing and building scale model dream cars. Held from the 1930s through the 1960s, it helped identify and nurture a whole generation of designers and design executives: Virgil M. Exner Jr., Charles M. Jordan, Robert W. Henderson, Robert A. Cadaret, Richard Arbib, Elia Russ, Russinoff, Galen Wickersham, Ronald C. Hill, Edward F. Taylor, George R. Chartier, Charles W. Pelly, Gary Graham, Charles A. Gibilterra, E. Arthur Russell, William A. Moore, Terry R. Henline, Paul Tatseos, Allen T. Weideman, Kenneth J. Dowd, Stuart Shuster, John M. Mellberg, Harry E. Schoepf, and Ronald J. Will are among those designers and design executives who participated in the Guild. The book also describes many aspects of the miniature model Napoleonic Coach and other scale model cars the students designed. *Catalog of Copyright Entries, Third Series* Library of Congress. This new collection of contributions to the field of Cognitive Technology (CT) provides the to date widest spectrum of the state of the art in the discipline—a discipline dedicated to humane factors in tool design. The reader will find here a summary of past research as well as an overview of new areas for future investigations. The collection contains an extensive CT agenda identifying many as yet unsolved CT-related design issues. An exciting new development is the concept of natural technology. Some examples of natural technologies are discussed, and the merits of empirical investigations into what they are and how they develop of interest to cognitive scientists and designers of new corrective digital technologies are pointed out. Another distinctive feature of the collection is that it provides examples of scientists' tools; important too is its emphasis on ethics in tool design. The collection ends with a provocative coda: any responses can appear in the new annual CT forum of the *Pragmatics and Cognition* journal. The collection will appeal to all scientists, humanists, and professionals interested in the interface between human cognitive processes and the technologies that augment them.      Demolition Means Progress Andrew R.
