The Fractured Marketplace for Standardized Testing Walter M. Haney,George F. Madaus,Robert Lyons,2012-12-06 Standardized testing in the United States has been increasing at a rapid pace in the last twenty five years The market for tests has not only been expanding rapidly but has also been changing sharply in structure into a fractured marketplace Indeed one of the main features of this book is that the market for standardized testing is highly fractured with segments of the market facing monopoly conditions others facing oligopoly conditions and still others where near free market conditions exist One of the main premises of the book is that the structures of markets have strong implications for how those markets perform While this notion is widely accepted among economists it is not widely appreciated in educational research A second motivation for the book is that very little scholarly attention has been focused on the standardized testing industry This topic the structure of the testing industry and implications for the quality of tests and test use affects how we evaluate the learning of students the effectiveness of teaching the quality of schools and the educational health of the nation Of particular concern to the authors is one vital aspect of test quality test validity This book is the most current and authoritative review and analysis of the market for standardized testing ECEL 2019 18th European Conference on e-Learning Rikke

An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test

based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools. This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize. But even after very clear disappointments no other policy framework has emerged to challenge its hegemony. The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector. As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree.
