MATH

OPEN-ENDED WORD PROBLEMS

The image displays a collection of educational materials for 3rd-grade math, specifically focusing on open-ended word problems and equivalent fractions. On the left, a worksheet titled '3.MD.A.2' features a word problem: 'Two rounded trees amounts and added them together for a total of 900 trees. What could the original amounts have been?'. Below this, another worksheet titled 'EQUIVALENT FRACTIONS' asks students to 'Write as many equivalent fractions to $\frac{1}{2}$ as you can.' and includes a section for 'EXPLAIN YOUR THINKING'. A yellow sticky note with the text 'MULTIPLE FORMATS!' is placed over the bottom left. On the right, a series of task cards are shown, each with a math problem and a 'PROVE' section. The problems include drawing shapes and shading them to represent fractions, and the 'PROVE' section contains the equation $900 - 550 = 350$. The materials are presented in a way that suggests they can be used in a clutter-free classroom environment.
