

Grade 4 Science *LEAP* Test Specifications

Test Sessions (untimed)

Session 1: 40 multiple-choice items

Session 2: 4 short-answer items

Session 3: 1 comprehensive science task with 3 short-answer items (2-point rubric) and 1 extended Constructed response item (4-point rubric)

The test items reflect the benchmarks and focus on both the *why* and the implications of phenomena in science, rather than focus on the *what* and the specific facts or details.

The **multiple-choice items** focus on important science concepts and the process of inquiry and allow students to show their breadth of understanding.

The **2-point short-answer items** address the unifying concepts and processes of science. These items allow students to reflect on a science concept, demonstrate their understanding, and make meaning from a given set of data. The wording of the items is direct and specific. Items that require multiple examples or reasons clearly state the exact number rather than a minimum (for example, "Give at least two reasons . . .").

The **comprehensive science task** integrates the Science as Inquiry strand with at least one content strand (such as Science and the Environment). Students are provided a science manipulative and are required to observe, use, and react to the material. Students are also expected to make scientific conclusions based on this experience. Separate card stock manipulatives are provided. The types of test items that accompany the science task may include data tables for students to complete or interpret. Students may be required to record data and observations about the manipulative.

Strand	Multiple-Choice (1 point)	Short-Answer (2 points)	ECR Items (4 points)	Score Points
1. Science as Inquiry	8	0		8
2. Physical Science	8	1		10
3. Life Science	8	1		10
4. Earth and Space Science	8	1		10
5. Science and the Environment	8	1		10
Comprehensive Science Task				
1. Science as Inquiry Dimension 1 (Questioning, Planning, Doing, and Recording)		1		2
1. Science as Inquiry Dimension 2 (Interpreting and Communicating)		2		4
2. Physical Science			1 (in one of the four strands)	4
3. Life Science

A Smarter Charter Richard D. Kahlenberg, Halley Potter, 2014-09-19 Moving beyond the debate over whether or not charter schools should exist A Smarter Charter wrestles with the question of what kind of charter schools we should encourage The authors begin by tracing the evolution of charter schools from Albert Shanker's original vision of giving teachers room to innovate while educating a diverse population of students to today's charter schools where student segregation levels are even higher than in traditional public schools In the second half of the book the authors examine two key reforms currently seen in a small but growing number of charter schools socioeconomic integration and teacher voice that have the potential to improve performance and reshape the stereotypical image of what it means to be a charter school
