Copyright Office, 1976-07     **Ski**, 1994-06     **Boating**, 1988-01     *Rollback* Richard Harrison, 2016-01-19 *Rollback* The Red Army s Winter Offensive along the Southwestern Strategic Direction 1942 43 covers the period from mid December 1942 to mid February 1943 one of the most critical periods of the war on the Eastern Front It was here that following the encirclement of an entire German army at Stalingrad the Soviets sought to take advantage of the ruptured Axis front in southern Russia to finish off the Germans Italian and Hungarian allies and liberate the economically vital areas of eastern Ukraine This study is drawn from a number of wartime and postwar articles published by the General Staff s directorate for the study of wartime experience Also featured are documents relating to the operational strategic conduct of the various operations which were compiled and published after the fall of the Soviet Union Several articles deal with the preparation for and conduct of the Southwestern Front s Middle Don operation of December 1942 Originally intended as an ambitious offensive to cut off the German forces in the North Caucasus by driving on to Rostov the operation was later

reoriented to meet the threat of the German effort to relieve Stalingrad. The offensive not only accomplished its objective of turning back the German attack thus dooming the Stalingrad garrison but also destroyed the Italian army in the East as well. The Soviet Voronezh Front then struck further up the Don River and in the Ostrogozhsk Rossosh operation destroyed what remained of the Italian forces in the area as well as the Hungarian army. This enabled the Red Army to capture Khar'kov and push nearly to the Dnepr River by mid February before being thrown back by a skillful German counteroffensive. The territorial results of this operation set the stage for the front's subsequent Voronezh-Kastornoe operation which enabled the Soviets to push as far west as Kursk before exhaustion and growing German resistance brought the offensive to a halt. Further to the south the Soviets were able to capture Voroshilovgrad and penetrate into the industrial Donets Basin. The book also contains a detailed Soviet examination of the employment of tank and mechanized corps during the campaign. The conclusions reached here had a direct bearing on the restructuring of the Red Army's tank armies in time for the summer campaign of 1943.

**Popular Science**, 1971-10 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better and science and technology are the driving forces that will help make it better.
