**Ubuntu Philosophy and Disabilities in Sub-Saharan Africa** Oliver Mutanga, 2023-11-03. This book uses Ubuntu philosophy to illuminate the voices of people with disabilities from Sub-Saharan Africa. Disability literature is largely dominated by scholars and studies from the Global North, and these studies are largely informed by Global North theories and concepts. Although disability literature in the Global South is now fast-growing, most studies continue to utilise conceptual, theoretical, and philosophical frameworks that are framed within Global North contexts. This presents two major challenges. Firstly, the voices of people with disabilities in the Global South remain on the fringes of disability discourses. Secondly, when their voices are heard, their realities are distorted. This edited book, consisting of 11 chapters, provides case studies from Botswana, Ghana, Lesotho, Uganda, and South Africa, exploring disability in various fields: Inclusive education, higher education environment, Open Distance Learning, and Technical and Vocational Education and Technical Colleges. The book contributes to the ways in which disability is understood and

experienced in the Global South thereby challenging the Western hegemonic discourses on disability This collection of contributions will be of interest to all scholars and students of disability studies development studies medical sociology and African studies
