The Defense Never Rests: Defense Mechanisms to the Rescue

Defense	Operation	Example
Repression	Person avoids anxiety by simply not allowing painful or dangerous thoughts to become conscious.	An executive's desire to run amok and attack his boss and colleagues at a board meeting is denied access to his awareness.
Denial	Person simply refuses to acknowledge the existence of an external source of anxiety.	You are not prepared for tomorrow's final exam, but you tell yourself that it's not actually an important exam and that there's no good reason not to go to a movie tonight.
Projection	Person attributes own unacceptable impulses, motives, or desires to other individuals.	The executive who repressed his destructive desires may project his anger onto his boss and claim that it is actually the boss who is hostile.
Rationalization	Person creates a socially acceptable reason for an action that actually reflects unacceptable motives.	A student explains away poor grades by citing the importance of the "total experience" of going to college and claiming that too much emphasis on grades would actually interfere with a well-rounded education.
Displacement	Person displaces hostility away from a dangerous object and onto a safer substitute.	After a perfect parking spot is taken by a person who cuts in front of your car, you release your pent-up anger by starting an argument with your roommate.
Intellectualization	Person represses emotional reactions in favor of overly logical response to a problem.	A woman who has been beaten and raped gives a detached, methodical description of the effects that such attacks may have on victims.
Regression	Person retreats from an upsetting conflict to an early developmental stage at which no one is expected to behave maturely or responsibly.	A boy who cannot cope with the anger he feels toward his rejecting mother regresses to infantile behavior, soiling his clothes and no longer taking care of his basic needs.

Zarra III, 2021-07-01 When the Secular Becomes Sacred Religious Secular Humanism and its Effects Upon America's Public

Learning Institutions is an analysis of American K 16 public learning institutions from a unique perspective. Secular teachings such as social emotional learning and sexual and identity philosophies are behind movements to capture the minds and hearts of America's students. Contemporary learning institutions resemble places of worship in several ways. This book will explain how this is the case. From educational philosophy to classroom practices, this book exposes tactical intersections between secular humanism and religion. In today's secular culture, there is strong evidence to support the notion that worship of the self, the individual, has usurped the historically sacred place reserved for a transcendent deity. The fact is that this worship of the individual is certainly more fashionable and attractive than traditional orthodoxy or evangelical theology in a today's society. Bolstering this self worship are mandated programs such as those found in states' controversial History Social Science Frameworks, English Language Arts Frameworks, and new sex education programs. The intention of this book is to provide the reader a realistic look into the effects of religious humanism upon America's schools and students. Readers will be challenged with the notion that separation of church and state is being ignored for the political advantage of some. Furthermore, the reader will be presented with the argument that self worship has become more attractive than traditional Judeo-Christian religious teachings, leading to the individual becoming both the worshipper and the object of such self worship.

The Answer to Anger June Hunt, 2013-05-01. June Hunt, a popular biblical counselor whose books have sold more than 250,000 copies, provides expert guidance and encouragement for those who want to overcome their anger issues. What's tricky about anger is how it can erupt unexpectedly. When it bursts forth, people are unsure of how to handle it. They're told anger is always bad, so they stuff it, mask it, and even medicate it to keep it from surfacing again. But in doing so, they never get to the root of the problem and learn constructive ways for dealing with it. *The Answer to Anger* provides clear, compassionate counsel for mastering this emotion. Readers will discover the four sources of anger, how to identify anger triggers, how to deal with buried anger, how to respond to angry people, how to act positively rather than react negatively. A great resource for learning how to replace anger with freedom and real peace.
