[Human Evolution and Cannabis: The Ultimate Gift](#)

T. Harish Kumar, 2017-09-29 Cannabis was commonly used during the ancient civilisation period and has many global advocates including Bob Marley Carl Sagan and even the 44th President of the United States Barack Obama However by law cannabis is illegal in most countries The global ban started off when the First Commissioner of the Federal Bureau of

Narcotics Harry J Anslinger declared that marijuana should be illegal as it is an addictive drug that causes insanity criminality and death Following that the Marihuana Tax Act of 1937 officially criminalises marijuana in the United States and this was then adopted by other nations Despite it being illegal cannabis is the most widely used illicit drug that researchers around the world proved to have numerous medical benefits The psychoactive compound Delta 9 tetrahydrocannabinol THC found in cannabis could intervene the psychological body and develop it Cannabis if used correctly can help improve mental health issues like depression anxiety bipolar disorder and more Besides it s many uses to treat various illnesses perhaps the most important use of cannabis in this era is to treat psychological diseases

Exploring Signature Pedagogies Regan A. R. Gurung, Nancy L. Chick, Aeron Haynie, 2023-07-03

From the Foreword: These authors have clearly shown the value in looking for the signature pedagogies of their disciplines. Nothing uncovers hidden assumptions about desired knowledge, skills, and dispositions better than a careful examination of our most cherished practices. The authors inspire specialists in other disciplines to do the same. Furthermore, they invite other colleagues to explore whether relatively new interdisciplinary fields such as Women's Studies and Global Studies have or should have a signature pedagogy consistent with their understanding of what it means to apprentice in these areas.

Anthony A. Ciccone, Senior Scholar and Director, Carnegie Academy for the Scholarship of Teaching and Learning

How do individual disciplines foster deep learning and get students to think like disciplinary experts? With contributions from the sciences, humanities, and the arts, this book critically explores how to best foster student learning within and across the disciplines. This book represents a major advance in the Scholarship of Teaching and Learning (SoTL) by moving beyond individual case studies, best practices, and the work of individual scholars to focus on the unique content and characteristic pedagogies of major disciplines. Each chapter begins by summarizing the SoTL literature on the pedagogies of a specific discipline and by examining and analyzing its traditional practices, paying particular attention to how faculty evaluate success. Each concludes by articulating for its discipline the elements of a signature pedagogy that will improve teaching and learning and by offering an agenda for future research. Each chapter explores what the pedagogical literature of the discipline suggests are the optimal ways to teach material in that field and to verify the resulting learning. Each author is concerned about how to engage students in the ways of knowing, the habits of mind, and the values used by experts in his or her field. Readers will not only benefit from the chapters most relevant to their disciplines. As faculty members consider how their courses fit into the broader curriculum and relate to the other disciplines and design learning activities and goals not only within the discipline but also within the broader objectives of liberal education, they will appreciate the cross-disciplinary understandings this book affords.

Essentials of Abnormal Psychology in a Changing World Jeffrey S. Nevid, 2004-10
