Historically Canadians have considered themselves to be more or less free of racial prejudice Although this conception has been challenged in recent years it has not been completely dispelled In Colour Coded Constance Backhouse illustrates the tenacious hold that white supremacy had on our legal system in the first half of this century and underscores the damaging legacy of inequality that continues today Backhouse presents detailed narratives of six court cases each giving evidence of blatant racism created and enforced through law The cases focus on Aboriginal Inuit Chinese Canadian and African Canadian individuals taking us from the criminal prosecution of traditional Aboriginal dance to the trial of members of the Ku Klux Klan of Canada From thousands of possibilities Backhouse has selected studies that constitute central moments in the legal history of race in Canada Her selection also considers a wide range of legal forums including administrative rulings by municipal councils criminal trials before police magistrates and criminal and civil cases heard by the highest courts in the provinces and by the Supreme Court of Canada The extensive and detailed documentation presented here leaves no doubt that the Canadian legal system played a dominant role in creating and preserving racial discrimination A central message of this book is that racism is deeply embedded in Canadian history despite Canada's reputation as a raceless society Winner of the Joseph Brant Award presented by the Ontario Historical Society *The Variation of Animals and Plants Under Domestication* Charles Darwin,2010-06-03

Darwin's big book a masterpiece of nineteenth century scientific investigation and a key text in the development of Darwin's thought *Social Work Treatment 4th Edition* Francis J. the current circumstances of political protest in photographic portraiture and against the mining of sacred Aboriginal land Crosscurrents in Australian First Nations and Non Indigenous Art testifies to the need for Australian institutions to collaborate with First Nations people more often and better This book will appeal to students and scholars of art history Indigenous anthropology and museum and heritage studies

Judicial Uses of Images Peter Goodrich,2023-07-24 A judge springs out of his car on the way to court in downtown Chicago and takes photographs of an inflatable rat A while later he inserts these photographs into a decision involving another insufflated rodent used in a union protest The increasing use of images in case law and precedent in the common law world provides a novel visual atlas of how lawyers see Using a corpus of many images drawn from decisions in different common law jurisdictions across the globe Judicial Uses of Images catalogues analyzes and reviews the normative significance and affective force of this new medium of legal expression and judgement The remediation of law is critically dissected in the terms of the emergent optical criteria and protocols of retinal justice

The Edge of Memory Patrick Nunn,2018-08-23 How much of the folk tales of our ancestors is rooted in fact and what can they tell us about the future In today s society it is the written word that holds the authority We are more likely to trust the words found in a history textbook over the version of history retold by a friend after all human memory is unreliable and how can you be sure your friend hasn t embellished the facts But before humans were writing down their knowledge they were passing it on in the form of stories The Edge of Memory celebrates the predecessor of written information the spoken word tales from our ancestors that have been passed down transmitting knowledge from one generation to the next Among the most extensive and best analysed of these stories are from native Australian cultures These stories conveyed both practical information and recorded history describing a lost landscape often featuring tales of flooding and submergence Folk traditions such as these are increasingly supported by hard science Geologists are starting to corroborate the tales through study of climatic data sediments and land forms the evidence was there in the stories but until recently nobody was listening In this book Patrick Nunn unravels the importance of these tales exploring the science behind folk history from around the world including northwest Europe and India and what it can tell us about environmental phenomena from coastal drowning to volcanic eruptions These stories of real events were handed down the generations over thousands of years and they have broad implications for our understanding of how human societies have developed through the millennia and ultimately how we respond collectively to changes in climate our surroundings and the environment we live in
