Aesth/ethics in Environmental Change Sigurd Bergmann, Irmgard Blindow, Konrad Ott, 2013 Can aesthetics and

ethics be integrated for the good of habitats places and spaces How can the arts widen our perception of nature and deepen environmental ethics Should the political meaning of a landscape be defined solely in terms of its economic and ecological values Questions like these are explored from the angles of arts environmental ethics ecology religious studies theology art history and philosophy The book prompts discussion about the aesthetic and spiritual dimension in the environmental humanities and it offers transdisciplinary insights into the challenge of sustainability and ongoing changes in society and the environment Series Studies in Religion and the Environment Studien zur Religion und Umwelt Vol 7 *Religion, Space, and the Environment* Sigurd Bergmann, 2017-07-05 Religions often nurture important skills that help believers locate themselves in the world Religious perceptions practices emotions and beliefs are closely interwoven with the environments from which they emerge Sigurd Bergmann's driving emphasis here is to explore religion not in relation to but as a part of the spatiality and movement within the environment from which it arises and is nurtured Religion Space and the Environment emerges from the author's experiences in different places and continents over the past decade At the book's heart lie the questions of how space place and religion amalgamate and how lived space and lived religion influence each other Bergmann explores how religion and the memory of our past impact our lives in urban spaces how the sacred geographies in Mayan and northeast Asian lands compare to modern eco spirituality and how human images and practices of moving in with and through the land are interwoven with the processes of colonization and sacralising and the practices of power and visions of the sacred among other topics **Savage Grace** Jay Griffiths, 2015-03-17 Jay Griffiths is a tour guide for anyone who has ever wished to commune with the side of our human psyche that remains in touch with the wild Equally at home among the sea gypsy Bajo people who live off the coast of Thailand and forage their food from the ocean floor drinking the psychedelic ayahuasca plant with Amazonian shamans or joining an Inuit whale hunt at the northern tip of Canada Griffiths takes readers on an adventure both charted and un chartable She divides her meditations on these travels into sections named after the ancient elemental properties of the universe Earth Air Fire Ice and Water because her subject matter is not merely the places traveled to but the depths of mind and the cultural narratives revealed by place It is a universal story told of far flung groups of humans with vastly different ways of life connected through the varied wilderness that sustains them By describing the ways in which human societies and the human mind have developed in response to the wilder elements of our homelands Savage Grace reveals itself as a benediction for the emotional intellectual and physical nourishment that people continue to draw from the natural world Under the sway of Griffiths charisma her poetic prose and her deeply learned and persuasive case for the wild roots of our shared human being we learn that we are all each and every one of us a force of nature
