Driving Demand for

Broadband Networks and Services Raul L. Katz, Taylor A. Berry, 2014-06-21 This book examines the reasons why various groups around the world choose not to adopt broadband services and evaluates strategies to stimulate the demand that will lead to increased broadband use. It introduces readers to the benefits of higher adoption rates while examining the progress that developed and emerging countries have made in stimulating broadband demand. By relying on concepts such as a supply and demand gap, broadband price elasticity and demand promotion, this book explains differences between the fixed and mobile broadband demand gap, introducing the notions of substitution and complementarity between both platforms. Building on these concepts, *Driving Demand for Broadband Networks and Services* offers a set of best practices and recommendations aimed at promoting broadband demand. The broadband demand gap is defined as individuals and households that could buy a broadband subscription because they live in areas served by telecommunications carriers but do not do so because of either economic limited awareness or lack of digital literacy reasons. This grouping represents a range from 30% of the population in the US, 40% in Germany and over 80% in most emerging countries. Research indicates that broadband usage is critical for social development, economic performance and overall welfare and so it behoves governments to encourage demand. This study is the first of its kind to address the demand side of broadband diffusion, incorporating an economic analysis while offering real world examples of policies and initiatives that have successfully spurred demand in developed and emerging markets alike. This book is intended for policy makers, managers of telecommunications and other technology companies as well as academics and graduate students in the areas of public policy, economic development and technology management. This book is an eye opener for policy makers. Traditionally, ICT policy has focused on the supply side. Katz and Berry develop great ideas to leapfrog Internet penetration from the demand side where the value of the Internet is. Diego Molano Vega, Minister of Information Technologies and Communications of Colombia. This book is an instant classic. It brilliantly and convincingly lays out the case why dealing with inadequate internet penetration has moved from the creation of supply to one of encouraging demand. It provides an information rich and well written presentation of the factors holding back people from becoming users and offers a hugely valuable survey of the various programs around the world to make the broadband internet truly useful to people everywhere. It is the kind of book writers in this field will use constantly. Eli Noam, Professor of Finance and Economics, Columbia Business School. This new study by Katz and Berry examines the rationale for national broadband plans and the evidence for their success in driving demand. It presents the latest data on broadband in a range of case study countries and provides best practice advice for policy makers and development practitioners. Dr Tim Kelly, Lead ICT Policy Specialist, World Bank.

Developing a Schoolwide Framework to Prevent and Manage Learning and Behavior Problems Kathleen Lynne Lane, Holly Mariah Menzies, Wendy Peia Oakes, Jemma Robertson Kalberg, 2019-11-13. Now revised and expanded, this volume explains how to design, implement and evaluate a comprehensive integrated three

tiered Ci3T model of prevention Rather than presenting a packaged program the book provides resources and strategies for designing and tailoring Ci3T to the needs and priorities of a particular school or district community Ci3T is unique in integrating behavioral academic and social emotional components into a single research based framework User friendly features include tools for collecting and using student and schoolwide data guidance for selecting effective interventions at each tier detailed case examples and tips for enhancing collaboration between general and special educators other school personnel and parents In a convenient large size format the volume includes several reproducible forms that can be downloaded and printed for repeated use Prior edition title Developing Schoolwide Programs to Prevent and Manage Problem Behaviors New to This Edition Updated step by step approach reflecting the ongoing development of Ci3T Chapter on evidence for the effectiveness of tiered models Chapter on low intensity teacher delivered strategies Chapter on sustaining effective implementation and professional development Lessons Learned feature reflections and examples from educators in a range of settings Perspectives on and from Institutional Ethnography James Reid,Lisa Russell,2017-11-15 This book explores recent developments in Institutional Ethnography IE and offers reflective accounts on how IE is being utilised and understood in social research IE is a sociological sub discipline developed by Dorothy E Smith that seeks to explicate the textual mediation of people s everyday experiences in their local sites of being **Integrated General Education** Catherine M. Wehlburg,2010-04-19 General education has been an essential part of American higher education for a long time Unfortunately it is often seen as something to get out of the way so that the student can go on to take the more important courses within a chosen major This volume changes that perception Topics discussed include Integrated General Education A Brief Look Back Why are Outcomes So Difficult to Achieve Making General Education Matter Structures and Strategies Unifying the Undergraduate Curriculum Through Inquiry Guided Learning University of the Pacific s Bookend Seminars on a Good Society Core Curriculum Revision at TCU How Faculty Created and Are Maintaining the TCU Core Curriculum Creating an Integrative General Education The Bates Experience Building an Integrated Student Learning Outcomes Assessment for General Education Three Case Studies Meaningful General Education Assessment That is Integrated and Transformative Institutions of higher education have a responsibility to develop a meaningful general education curriculum that cultivates qualities of thinking communication and problem solving to name a few of the general education goals that many institutions share What is missing from many institutions though is the concept of integrating general education with the overall educational curriculum If this is done general education courses are no longer something to take quickly so they can be checked off instead they become part of the educational development of the student This integration benefits the student certainly but also the larger society baccalaureate graduates steeped in the liberal arts will become future leaders Having been prepared with a broad knowledge base our current students will be able to think more critically and make good use of information to solve problems that have not yet even been identified This is the 121st volume

of the Jossey Bass higher education quarterly report series New Directions for Teaching and Learning which offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers

Arts and Humanities in Progress Dario Martinelli, 2016-10-13

The book aims to introduce a research concept called Numanities as one possible attempt to overcome the current scientific social and institutional crisis of the humanities Such crisis involves their impact on and role within society their popularity among students and scholars and their identity as producers and promoters of knowledge The modern western world and its economic policies have been identified as the strongest cause of such a crisis Creating the conditions for but in fact encouraging it However a self critical assessment of the situation is called for Our primary fault as humanists was that of stubbornly thinking that the world s changes could never really affect us as we felt our identity was sacred In the light of these approaches the main strengths of humanities have been identified in the ability to promote critical thinking and analytical reasoning provide knowledge and understanding of democracy and social justice develop leadership cultural and ethical values The main problems of humanities are the lack economic relevance the socio institutional perception of them as impractical and unemployable the fact that they do not match with technological development Finally the resulting crisis consists mainly in the absence or radical reduction of funding from institutions a decrease in student numbers a decrease in interest a loss of centrality in society A Numanities New Humanities project should consider all these aspects with self critical assessment on the first line The goal is to unify the various fields approaches and also potentials of the humanities in the context dynamics and problems of current societies and in an attempt to overcome the above described crisis Numanities are introduced not as a theoretical paradigm but in terms of an umbrella concept that has no specific scientific content in it that particularly means that the many existing new fields and research trends that are addressing the same problems post humanism transhumanism transformational humanities etc are not competitors of Numanities but rather possible ways to them Therefore more than a theoretical program Numanities intend to pursue a mission and that is summarized in a seven point manifesto In the light of these premises and reflections the book then proceeds to identify the areas of inquiry that Numanities in their functions and comprehensive approach seek to cover The following list should also be understood as a statement of purposes for this entire book series These in other words will be the topics areas we intend to represent Once elaborated on the foundations of Numanities the book features a second part that presents two case studies based on two relatively recent and now updated investigations that the author has performed in the fields of musical and animal studies respectively The two cases and relative areas of inquiry were selected because they were considered particularly relevant within the discussion of Numanities and in two different ways In the first case study the author discussed the most typical result or perhaps cause of the technophobic attitude that was addressed in the first part of the book the issue of authenticity as applied in the author s particular study to popular music In the second case study he analyzes two different forms of comparative analysis between human and non human cognition like in the former case this study too is aimed at a critical

commentary on what the author considers redundant biases in current humanistic research anthropocentrism and speciesism
