**Index Medicus**, 2004 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings Recent insights into perceptual and motor skill learning (The computational and neural processes underlying perceptual and motor skill learning) Lior Shmuelof, John W Krakauer, 2015-03-18 Improvements in task performance following practice can occur as a result of changes in distinct cognitive and neural processes In some cases we can improve our performance by selecting a more successful behavior that is already part of our available repertoire Skill learning on the other hand refers to a slower process that results in improving the ability to perform a behavior i.e. it involves the acquisition of a behavior that was not available to the controller before training Skill learning can take place both in the sensory and in the motor domains Sensory skill acquisition in perceptual learning tasks is measured by improvements in sensory acuity through practice induced changes in the sensitivity of relevant neural networks Motor skill is harder to define as the term is used whenever a motor learning behavior improves along some dimension Nevertheless we have recently argued that as in perceptual learning acuity is an integral component in motor skill learning In this special topic we set out to integrate experimental and theoretical work on perceptual and motor skill learning and to stimulate a discussion regarding the similarities and differences between these two kinds of learning Shaping Smart for Better Cities Alessandro Aurigi, Nancy Odendaal, 2020-11-14 Shaping Smart for Better Cities powerfully demonstrates the range of theoretical and practical challenges opportunities and success factors involved in successfully deploying digital technologies in cities focusing on the importance of recognizing local context and multi layered urban relationships in designing successful urban interventions The first section Rethinking Smart in Places interrogates the smart city from a theoretical vantage point The second part Shaping Smart Places examines various case

studies critically Hence the volume offers an intellectual resource that expands on the current literature but also provides a pedagogical resource to universities as well as a reflective opportunity for practitioners The cases allow for an examination of the practical implications of smart interventions in space whilst the theoretical reflections enable expansion of the literature Students are encouraged to learn from case studies and apply that learning in design Academics will gain from the learning embedded in the documentation of the case studies in different geographic contexts while practitioners can apply their learning to the conceptualisation of new forms of technology use Demonstrates how to adapt smart urban interventions for hyper local context in geographic parameters spatial relationships and socio political characteristics Provides a problem solving approach based on specific smart place examples applicable to real life urban management Offers insights from numerous case studies of smart cities interventions in real civic spaces Exercise Physiology for Health, Fitness, and Performance Denise Smith, Sharon Plowman, Michael Ormsbee, 2022-07-12 With this new 6th Edition Exercise Physiology for Health Fitness and Performance continues to provide an authoritative resource for mastering exercise physiology This engaging accessible and approachable resource integrates theoretical and research based basic exercise physiology with real world application to prepare students for exciting positions in exercise science fitness physical education athletic training rehabilitation coaching and or allied health professions Updated throughout the text uses sound pedagogical principles to explain scientific research that is the foundation of exercise physiology and incorporates multiple features to help students apply their knowledge to improve human health fitness and performance Content in this edition is organized by independent units Metabolic Cardiovascular Respiratory Neuromuscular Skeletal and Neuroendocrine Immune offering maximum teaching flexibility for faculty and ensuring a consistent efficient and effective learning experience for students
