## **Active Light Issues Of Light In Contemporary Theatre:**

**Active Light** Fabrizio Crisafulli, Dorita Hannah, Luca Farulli, 2013 This book looks at various important events relating to the poetics of light in theatre production in the West in the twentieth century from the great reformists at the beginning of the century to contemporary artists such as Josef Svoboda Alwin Nikolais and Robert Wilson The intention isn't to outline a somewhat comprehensive history of stage lighting instead it is an attempt to identify some basic issues concerning its use Lighting issues are unshackled from the limited contexts of technique and image where they often end up only to be relegated and examined in the context of the performance's space time structure poetic and dramatic construction and the relationship with the performer A section dedicated to the theatrical work of the author outlines the distinctive point of view behind the book regarding the creative processes and the operational relationship with technique The title *Active Light* is a direct reference to Adolphe Appia who at the end of the nineteenth century was one of the first to deal with the issue of light explicitly as an artistic issue in theatre with his own writings and creations As far as Appia was concerned *lumiere active* was expressive light creating shapes forming poetic matter and dramatic substance *Voices and Practices in Applied*
