Resisting the Kinder-Race Christopher P. Brown, 2021 Kindergarten has changed Many believe that it no longer reflects a nurturing environment but instead has become a race for children to learn skills so they are ready for the academic achievement tests that they will take continuously throughout their time in school Resisting the Kinder Race examines how the race came about why it must change and how all stakeholders in the early childhood and elementary school communities must take part in the reform process The author draws on his own research to consider how the Kinder Race might be reimagined through more democratic principles of schooling Brown offers both practical and political strategies that can alter the day to day practices of the kindergarten classroom and the policies that currently define PreK 12

education in the United States This resource will help readers see kindergarten as an educational environment that expands the learning of every child Book Features Provides an in depth glimpse into a typical day in the Kinder Race Examines how kindergarten devolved from a garden that nurtures children into a race that dashes them from skill to skill Brings together what are often siloed conversations among stakeholder groups Highlights how kindergarten is now primarily defined through an economic lens and how this framing of learning earning and consuming might be rethought Employs varied conceptual frameworks to investigate how stakeholders across different levels of public education make sense of the changed kindergarten Illuminates the complexity of what is occurring in today s kindergarten and puts forward practical and achievable ideas for change *TIME FOR KIDS® Practicing for STAAR Success: Mathematics: Grade 4* Beth

Practices Keengwe, Jared,2020-12-11 While many school districts and institutions of higher education still cling to the traditional agrarian school year with a factory model delivery of education and Carnegie units based on seat time when most people are no longer farmers factory workers or reliant on learning in a classroom there are bursts of promising practices that buck the norm by questioning the educational value of these traditions Though researchers have investigated the potential of students learning in their own homes via personalized instruction delivered by computers rather than attending traditional institutions the status quo in education has remained stubbornly resistant to change Mixed reality simulations year round schooling grouping students by competencies instead of age and game based teaching are just a few of the educational innovations that seek to maximize learning by recognizing that innovation is essential for successfully teaching students in the modern era The Handbook of Research on Innovations in Non Traditional Educational Practices is a

comprehensive reference source that examines various educational innovations how they have developed workarounds to navigate traditional systems and their potential to radically transform teaching and learning With each chapter highlighting a different educational innovation such as experiential learning game based learning online learning and inquiry based learning and their applications in all levels of education this book explores the issues and challenges these educational innovations face as well as their impact It is intended for academicians professionals administrators and researchers in education and specifically benefits academic deans vice presidents of academic affairs graduate students faculty technology leaders directors of teaching and learning centers curriculum and instructional designers policymakers principals and superintendents and teachers interested in educational change
