Educational Evaluation, Assessment and Monitoring Cees Glas, Jaap Scheerens, Sally M. Thomas, 2006-01-16 This book looks at the foundations of school self-evaluation from a scientific as well as from a practical perspective. Planning, concepts, restructuring of education systems, organizational theory, on schools' evaluation methodology and models of school effectiveness and school improvement are discussed as contributing to the overall conceptualization of school self-evaluation. A broad range of approaches is presented and methodological requirements are discussed. School self-evaluation contains controversial issues that reflect tension between the need for objectivity in a context that is permeated by values and potential conflicts of interests. Similar tensions may be seen to exist with respect to the static and reductionist aspects of available data collection procedures in a complex and dynamic situation and the appeal for external accountability on the one hand and improvement-oriented self-reflection on the other. The mission of the book is to clarify these tensions and offer ways to deal with them in practical applications. The school effectiveness knowledge base is offered as a substantive educational frame of references that serves an important function in selecting relevant factors for data collection and the use of the evaluation results.

Testing and Assessment Great Britain. Parliament. House of Commons. Children, Schools and Families Committee, 2008 Testing and Assessment Third report of session 2007-08 Vol 2 Oral and written Evidence. Learning to Teach Gill Nicholls, 2014-05-12 Written in accordance with the Teacher Training Association and DfEE guidelines, this text is intended to become a course reference.
