Körntgen, Dominik Waßenhoven, 2013-01-30 The increased interest in religion as a phenomenon and its various cultural
contexts is encouraging a focus on the relationship between religion and politics However the political relevance of the
religious and the interdependence between political and religious spheres has always been a major area of medieval research
The articles in this volume consider not only the principle inseparability of both spheres as previously established by research
but also the beginnings of a differentiation and relative autonomy of religion and politics within the framework of a
comparison between Germany and the United Kingdom This allows the identification of restrictions within the research
traditions that are due to national histories and points to ways of overcoming these restrictions **Verhandlungen**
