Indigenous Perspectives of North America Judit Nagy, Enikő Sepsi, Miklós Vassányi, 2014-08-20 The present volume brings to North American Native Studies with its rich tradition and accumulated expertise in the Central European region the new complexities and challenges of contemporary Native reality The umbrella theme Indigenous perspectives brings together researchers from a great variety of disciplines focusing on issues such as democracy and human rights international law multiculturalism peace and security economic and scientific development sustainability literature and arts and culture as well as religion The thirty five topical and thought provoking articles written in English French and Spanish offer a solid platform for further critical investigations and a useful tool for classroom discussions in a wide variety of academic fields *Parole in Canada* Sarah Turnbull, 2016-10-25 Just as Canada's population has changed in the past four decades so too has its prison population The increasing diversity among prisoners raises important questions about how we punish those who break the law *Parole in Canada* is the first book to explore how concerns about Aboriginality gender and the multicultural ideal of diversity have been interpreted and used to alter federal parole policy and practice Using the Parole of Board of Canada as a case study this book shows how certain facets of offender differences are selectively included for accommodation while fundamental institutional structures practices and power arrangements remain unchanged Sarah Turnbull argues that as the current approach fails to challenge outdated notions about gender race and aboriginality within the penal system instead of addressing concerns around diversity these measures end up contributing to further exclusion and discrimination within the system Information Technology and Indigenous People Dyson, Laurel Evelyn, Hendriks, Max, Grant, Stephen, 2006-08-31 This book provides theoretical and empirical information related to the planning and execution of IT projects aimed at serving indigenous people It explores cultural concerns with IT implementation including language issues questions of cultural appropriateness Provided by publisher *Aboriginal Self-government in Canada* Yale Deron Belanger, 2008 Building on the success of the first two editions this volume briefly recaps the historical development and public acceptance of the concept of Aboriginal self government then proceeds to examine its theoretical underpinnings the state of Aboriginal self government in Canada today and the many practical issues surrounding implementation Topics addressed include justice innovations initiatives in health and education to grant greater Aboriginal control financing and intergovernmental relations Aboriginal municipal government relations developing effective Aboriginal leadership M tis self government aspirations the intersection of women's rights and self government and international perspectives Various self government arrangements already in existence are examined including the establishment of Nunavut the James Bay Agreement Treaty Land Entitlement settlements the Alberta M tis settlements and many other land claims settlements that have granted Aboriginal communities greater control over their affairs Pub website A Handbook of Aboriginal Languages of New South Wales and the Australian Capital Territory James William Wafer, Amanda Lissarrague, 2008 The handbook is a guide to Aboriginal languages

Pilbara psychologist and Nyamal woman Tracy Westerman has redefined what's possible at every turn. Despite neither of her parents progressing past primary school and never having met a psychologist before attending university, Tracy was the first Aboriginal person in Australia to complete a PhD in Clinical Psychology, rising to become one of the country's foremost psychologists. Against significant odds, she commenced her own private business to challenge the way the mental health profession responds to cultural difference and recently established a charitable foundation and scholarship program to mentor Indigenous people from our highest risk communities to become psychologists. Tracy draws on client stories of trauma, heartbreak, hope, and connection from her years of practice, offering a no-holds-barred reflection on how the monocultural one-size-fits-all approach to psychology is failing Aboriginal people and how she's healing those wounds. Jilya is a story of drive and determination of what it takes to create change when the odds are stacked against you. Above all, it is a story of one woman's love for her people.

Values Education and Quality Teaching Terence Lovat, Ron

Toomey, 2009-04-07 Some revision of public schooling history is necessary to challenge the dominant mythology that public schools were established on the grounds of values neutrality. In fact, those responsible for the foundations of public education in Australia were sufficiently pragmatic to know that its success relied on its charter being in accord with public sentiment. Part of the pragmatism was in convincing those whose main experience of education had been through some form of church-based education that state-based education was capable of meeting the same ends. Hence the documents of the 1870s and 1880s that contained the charters of the various state and territory systems witness to a breadth of vision about the scope of education. Beyond the standard goals of literacy and numeracy, education was said to be capable of assuring personal morality for each individual and a suitable citizenry for the soon-to-be new nation. As an instance, the NSW Public Instruction Act of 1880 (cf. NSW 1912) under the rubric of religious teaching stressed the need for students to be inculcated into the values of their society, including understanding the role that religious values had played in forming that society's legal codes and social ethics. The notion, therefore, that public education is part of a deep and ancient heritage around values neutrality is mistaken and in need of serious revision. The evidence suggests that public education's initial conception was of being the complete educator, not only of young people's minds but of their inner character as well.
