

Pro Choice Abortion: Because It's Safer

Introduction

Whether or not a women should be able to legally have an abortion in the United States is a very controversial issue. Abortion is the deliberate termination of a pregnancy. It became legal in 1973 after the deliberation of the supreme court case 'Roe vs. Wade'. Before then it was very hard for women to have abortions and many sought out doing it on their own. Since as early as the 13th century abortion has been considered homicide. As far as current laws, abortion is legal throughout the United States but some states make it harder to get one. For example, Mississippi has some of the most restrictive laws which makes it the hardest state to get an abortion. In fact the state itself only has one functional Planned Parenthood clinic.

Other states like California and New Mexico have minimal restrictions. Many women who want to have an abortion have to travel across state lines because of their states' restrictive laws. For example a woman from Oklahoma had to travel 4 hours to Kansas just to have an abortion. Southern states typically have stricter abortion laws. States like Missouri and Mississippi only have one abortion clinic in the whole state. Other states like California and New York have a large amount of abortion clinics. Great intro! Informative and detailed, sets reader up to know enough to get into perspectives.

Main Body of Paper

Abortion is currently, and has been throughout the 21st Century, a controversial issue.

Primarily there have two main sides the argument, pro choice and pro life. Majority of the reasoning on the pro choice is that a woman should be able to have the right to do what she wants with her body. The U.S. Supreme court has also declared the right to abort as a "fundamental right" which is described as a basic human right. Other examples of fundamental rights are privacy and procreation. A lot people also explain that there are many reasons as to why a woman may need to have an abortion. (look at how the sentence before this is worded) Medical complications for the mother and baby may be an issue or a woman may simply not have the means to take care of a child. The pro life side of the argument says that the fetus is a human being and they should have the right of life. A baby should not be terminated simply because a woman is not ready to have a child. To them abortion is considered murder because you are terminating one's life. Another pro life argument is that human life begins at conception so a baby has the right to live just like any other person. Well done paragraph on two sides of abortion argument

Religious Beliefs on Abortion and its Impact on Abortion Law in the U.S.

Religious perspectives also contribute to whether or not a woman gets an abortion, which in the end would affect her health. In those religions in which a woman is banned from having an abortion, the health effects of having an abortion are more negative.

Social Movements and American Political Institutions Anne N. Costain, Andrew S. McFarland, 1998 Social movements in the United States are important political actors because of their scale and duration their generation of new ideas and understandings of existing problems their ability to mobilize those who were previously passive citizens and the impetus they provide for restructuring and broadening the agenda of American politics This volume combines chapters by a distinguished group of social movement scholars from both sociology and political science who use perspectives ranging from political process theory to rational choice and collective action approaches to evaluate the functioning of institutions of American government and the public policies that they produce A diverse group of movements and interests are featured women public interest native America the environment the Christian Right abortion gay rights and homelessness among them

We Gather Together Neil J. Young, 2015-10-01 The story of the birth of the Religious Right is a familiar one In the 1970s mainly in response to Roe v Wade evangelicals and conservative Catholics put aside their longstanding historical prejudices and theological differences and joined forces to form a potent political movement that swept across the country In this provocative book Neil J Young argues that almost none of this is true Young offers an alternative history of the Religious Right that upends these widely believed myths Theology not politics defined the Religious Right The rise of secularism pluralism and cultural relativism Young argues transformed the relations of America s religious denominations The interfaith collaborations among liberal Protestants Catholics and Jews were met by a conservative Christian counter force which came together in a loosely bound politically minded coalition known as the Religious Right This right wing religious movement was made up of Mormons conservative Catholics and evangelicals all of whom were united paradoxically by their contempt for the ecumenical approach they saw the liberal denominations taking Led by the likes of Jerry Falwell they deemed themselves the pro family movement and entered full throated into political debates about abortion school prayer the Equal Rights

Amendment gay rights and tax exemptions for religious schools They would go on to form a critical new base for the Republican Party Examining the religious history of interfaith dialogue among conservative evangelicals Catholics and Mormons Young argues that the formation of the Religious Right was not some brilliant political strategy hatched on the eve of a history altering election but rather the latest iteration of a religious debate that had gone on for decades This path breaking book will reshape our understanding of the most important religious and political movement of the last 30 years

The Making of Pro-life Activists Ziad W. Munson, 2010-07-15 How do people become activists for causes they care deeply about Many people with similar backgrounds for instance fervently believe that abortion should be illegal but only some of them join the pro life movement By delving into the lives and beliefs of activists and nonactivists alike Ziad W Munson is able to lucidly examine the differences between them Through extensive interviews and detailed studies of pro life organizations across the nation Munson makes the startling discovery that many activists join up before they develop strong beliefs about abortion in fact some are even pro choice prior to their mobilization Therefore Munson concludes commitment to an issue is often a consequence rather than a cause of activism The Making of Pro life Activists provides a compelling new model of how people become activists while also offering a penetrating analysis of the complex relationship between religion politics and the pro life movement Policy makers activists on both sides of the issue and anyone seeking to understand how social movements take shape will find this book essential

Lexical Perspectives on Transitivity and Ergativity Maarten Lemmens, 1998-10-15 Fusing insights from cognitive grammar systemic functional grammar and Government Binding the present work elaborates and refines Davidse's view that the English grammar of lexical causatives is governed by the transitive and ergative paradigms two distinct models of causation Davidse 1991 1992 However on the basis of extensive synchronic and diachronic data on verbs of killing e.g. kill execute choke or drown it is shown that transitivity and ergativity are not absolute but prototypical characteristics of verbs which may be overruled by the semantics of the construal in which they occur The variable transitive or ergative character of the verbs reveals the complex interaction between the semantics of the construction and that of the verb The diachronic analyses further illustrate how in the course of time verbs may change their paradigmatic properties either temporarily e.g. the ergativization of strangle throttle and smother or permanently e.g. the causativization of starve or the partial transitivity of abort The analyses show that these changes are semantically well motivated and further illustrate the cognitive reality of the two causative models The work explores the experiential basis of the prototypical paradigmatic behaviour of verbs e.g. the ergative predilection of the SUFFOCATE verbs In addition it attempts to shed more light on the semantics and restrictions of certain constructions such as the medio passive the derivation of adjectives in -able or the derivation of agentive nominals in -er
