

ABR Core Examination Preparation:

Results of a Survey of Fourth-Year Radiology Residents Who Took the 2013 Examination

Anup S. Shetty, MD, Joseph R. Grajo, MD, Summer Decker, PhD, Darel E. Heitkamp, MD, Kristen K. DeStigter, MD, Duane G. Mezwa, MD, Lori Deitte, MD

Rationale and Objectives: A survey was administered to fourth-year radiology residents after receiving their results from the first American Board of Radiology (ABR) Core examination in 2013. The purpose was to gather information regarding resources and study strategies to share with program directors and future resident classes.

Materials and Methods: An online survey was distributed to examinees nationwide. The survey included free-response and multiple choice questions that covered examination results, perceived value of enumerated study resources, case-based and didactic teaching conferences, board reviews, study materials for noninterpretive skills, multidisciplinary conference attendance, and free-form comments.

Results: Two hundred sixty-six of 1186 residents who took the Core examination responded to the survey. Some resources demonstrated a significant difference in perceived value between residents who passed the examination and residents who failed, including internal board reviews (1.10, $P < .01$), daily didactic conferences (1.51, $P < .01$), and daily case conferences (1.43, $P < .01$). Residents who passed reported that conferences and review sessions at their institutions were modified with multiple choice questions, audience response, and integration of clinical physics and patient safety topics compared to residents who failed.

Conclusions: Radiology residents and residency programs have adapted their preparations for the ABR Core examination in a variety of ways. Certain practices and study tools, including daily conferences and internal board reviews, had greater perceived value by residents who passed the examination than by residents who failed. This survey provides insights that can be used to assess and modify current preparation strategies for the ABR Core examination.

Key Words: American Board of Radiology; core examination; fourth year residents; survey.

Standardized examinations are an integral component of a radiologist's educational journey. The Medical College Admission Test, United States Medical Licensing Examinations, and the American Board of Radiology (ABR) examinations are requisite steps in a trainee's

career. Over the past two decades, the ABR has actively discussed the principles guiding its examinations (1–3). The traditional board certification model consisted of a three-step process, which included a physics examination, a written examination, and a certifying oral examination. In 2007, the ABR announced the decision to transition from this historical board certification model to an image-rich computerized examination administered in two parts: the Core examination and the certifying examination (4).

Fourth-year radiology residents comprised the first cohort to take the new qualifying ABR Core examination in October 2013. Residents, program directors, and faculty expressed similar concerns regarding how best to prepare for the new examination format. In response to this need, members of the Association of Program Directors in Radiology (APDR), American Alliance of Academic Chief Residents in Radiology (A³CR²), and Association of Program Coordinators in Radiology (APCR) collaborated on a survey of fourth-year radiology residents who took the first installment of the new Core examination in October 2013 to identify effective study tools, review methods, and best practices for preparation for the ABR Core examination, and to provide feedback to the ABR. The results of this survey were

Sprinkle, Jr., 2014-03-05 In 1966 American historic preservation was transformed by the passage of the National Historic Preservation Act which created a National Register of Historic Places Now comprising more than 1 4 million historic properties across the country the National Register is the official federal list of places in the United States thought to be worthy of preservation

One of the fundamental principles of the National Register is that every property is evaluated according to a standard set of criteria that provide the framework for understanding why a property is significant in American history. The origins of these criteria are important because they provide the threshold for consideration by a broad range of federal preservation programs from planning for continued adaptive use to eligibility for grants and inclusion in heritage tourism and educational programs. Crafting Preservation Criteria sets out these preservation criteria for students explaining how they got added to the equation and elucidating the test cases that allowed for their use. From artworks to churches from the fifty year rule to the historic scene students will learn how places have been historically evaluated to be placed on the National Register and how the criteria evolved over time.
