This book is the product of more than half a century of leadership and innovation in physics education. When the first edition of *University Physics* by Francis W Sears and Mark W Zemansky was published in 1949, it was revolutionary among calculus-based physics textbooks in its emphasis on the fundamental principles of physics and how to apply them. The success of *University Physics* with generations of several million students and educators around the world is a testament to the merits of this approach and to the many innovations it has introduced subsequently. In preparing this First Australian SI edition, our aim was to create a text that is the future of Physics Education in Australia. We have further enhanced and developed *University Physics* to assimilate the best ideas from education research with enhanced problem-solving instruction, pioneering visual and conceptual pedagogy, the first systematically enhanced problems, and the most pedagogically proven and widely used online homework and tutorial system in the world, *Mastering Physics*.      **The Electric Journal**, 1916      [The Electronics Journal](#), 1913      **The Street Railway Journal**, 1903      **Dyke's Automobile and Gasoline Engine Encyclopedia** A.L.
