Working with Chemistry Donald J. Wink, Sharon Fetzer-Gislason, Julie Ellefson Kuehn, 2004-02-20 With this modular laboratory program students build skills using important chemical concepts and techniques to the point where they are able to design a solution to a scenario drawn from a professional environment The scenarios are drawn from the lives of people who work with chemistry every day ranging from field ecologists to chemical engineers and include many health professionals as well

Million Dollar Data: Building Confidence - Vol.1 Stephen DeMeo, 2020-07-31 Global warming our current and greatest challenge is without precedent Among the many consequences that are impacting our society one unanticipated concern involves scientific truth When the President of the United States and others in his administration declare that global warming is fake science it calls into question what real science is and what real school science should be I will argue that real science is quality science one that is based on the rigorous collection of reliable and valid data To collect quality data requires bending over backwards to get things right and this is exactly what makes science so special Truth is made when scientists go this extra yard and devise controlled experiments collect large data sets confirm the data and rationally analyze their results Making scientific truth sounds difficult to do in the science laboratory but in reality there are many straightforward ways that truth can be constructed In the first of two volumes I discuss twelve such ways I call them Confidence Indicators that can allow students to strongly believe in their data and their subsequent results Many of these methods are intuitive and can be used by young students on the late elementary level all the way up to those taking introductory college science courses As in life science is not without doubt In the second volume I introduce the concept of scientific uncertainty and the indicators used to calculate its magnitude I will show that science is about connecting confidence with uncertainty in a specific manner what I refer to as the Confidence Uncertainty Continuum expression This important relationship epitomizes the scientific enterprise as a search for probabilistic rather than absolute truth This two volume set will contain a variety of ways that data quality can be instituted into a science curriculum To support its use many of the examples that I will present involve science teachers as well as student work and feedback from different grade levels and in different scientific disciplines Specific chapters will be devoted to reviewing the academic literature on data quality as well as describing my own personal research on this important but often neglected topic

It Isn't Inclusion Without Peers: Supporting Students With and Without Disabilities to Learn Together (The Norton Series on Inclusive Education for Students with Disabilities) Matthew Brock, 2023-08-01 Peer mediated interventions benefit all students in the classroom Peer mediated interventions are a category of practices in which students without disabilities provide academic and social support to classmates with disabilities in inclusive classrooms cafeterias and on playgrounds These support strategies are shown to have positive effects on academic interpersonal and social development not only for students with disabilities but also for their classmates who serve as peer supports Students with a variety of disabilities benefit from peer mediated support

interventions including students with intellectual disabilities autism spectrum disorder and multiple disabilities In this book Matthew Brock provides educators with a practical guide to the implementation of peer mediated interventions General and special education teachers will receive expert guidance on how to decide which combination of interventions is likely to work best for each child and how to collaborate with paraeducators and each other to implement the selected strategies **HIT Lab Report** University of Michigan.
