Popular Science ,2004-12 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Marketing Research** Joseph F. Hair,Robert P. Bush,David J. Ortinau,2006 Marketing Research 3 e takes an application oriented approach providing students with the tools and skills necessary to solve business problems and exploit business opportunities This book is unique from any other in the market in three significant ways First it provides a greater balance between primary and secondary information and the techniques and methods that underpin these two important types of data Second it offers in depth coverage of the critical research tools and skills that will be required of today and tomorrow s marketing researchers and business decision makers Third with its in depth coverage of secondary research the practice of customer based management is highlighted as this book helps students see what real companies are doing for their marketing research This book provides students a realistic and current view of the practice and importance of marketing research in the business world Road and Track ,1996-05 **Forward Error Correction and Detection Code for Packet Radio** Chi-Fung Lam (University of Manitoba student),1990 **Error Detecting Codes** Torleiv Kløve,Valery Korzhik,1995-09-30 Error detecting codes are very popular for error control in practical systems for two reasons First such codes can be used to provide any desired reliability of communication over any noisy channel Second implementation is usually much simpler than for a system using error correcting codes To consider a particular code for use in such a system it is very important to be able to calculate or estimate the probability of undetected error For the binary symmetric channel the probability of undetected error can be expressed in terms of the weight distribution of the code The first part of the book gives a detailed description of all known methods to calculate or estimate the probability of undetected error for the binary symmetric channel in particular but a number of other channel models are also considered The second part of the book describes a number of protocols for feedback communication systems ARQ systems with methods for optimal choice of error detecting codes for the protocols Results have been collected from many sources and given a unified presentation The results are presented in a form which make them accessible to the telecommunication system designer as well as the coding theory researcher and student The system designer may find the presentation of CRC codes as well as the system performance analysis techniques particularly useful The coding theorist will find a detailed account of a part of coding theory which is usually just mentioned in most text books and which contains a number of interesting and useful results as well as many challenging open problems Audience Essential for students practitioners and researchers working in communications and coding theory An excellent text for an advanced course on the subject
