

1999, 2000). However, the results of the present study suggest that the use of a single, non-validated measure of self-esteem may not be sufficient to capture the complexity of self-esteem in the workplace. Future research should explore the use of multiple measures of self-esteem to better understand its role in organizational behavior.

Adams Avenue School For Individually Guided Education

Mary Haywood Metz

Adams Avenue School For Individually Guided Education:

Different by Design Mary Haywood Metz, 2003-08 Back in print for use in your courses this classic text features a new introduction by the author that situates the book in the context of present day educational debates This historic study analyzes the organizational and political pressures that combined to make three magnet schools distinctive social environments a rare glimpse at the critical processes with which teachers and students in both regular schools and schools of choice must constantly struggle In her new introduction Metz discusses many of today's hot topics including school choice curricular reform and school equity She also looks at what has transpired in the school district and the schools since her study was first published two decades ago The depth of detail in these case studies along with the clear and systematic discussion of each school in terms of the theoretical framework provided by the author make this a sought after textbook for educational policy and school organization courses

The Collaborative School Stuart Carl Smith, James Joseph Scott, 1990 The benefits of a collaborative work setting including such practices as mutual help exchange of ideas joint planning and participative decision making have been consistently confirmed by studies of effective schools and successful businesses However teacher isolation remains the norm Drawing on recent research and educators firsthand experiences this book explores the benefits of collaboration describes various collaborative practices and programs already occurring in schools and shows how these practices can be introduced using currently available resources As chapter 1 shows collaboration has no single model and can occur in formal programs or informally among a few faculty members Collaboration cannot be imposed from above but depends on educators voluntary efforts at self improvement through teamwork Collaborative schools foster help related exchange harmonize teachers professional autonomy and principals managerial authority and convert teacher accountability to a self policing policy The second chapter shows the costs of self imposed professionally sanctioned teacher isolation as contrasted with the benefits of collaboration including increased professional development opportunities improved student cooperation and a more collegial learning environment The third chapter surveys current collaborative practices in such areas as school improvement professional development teacher evaluation and school decision making Chapter 4 shows that developing new practices is itself a collaborative process involving all school professionals Strategies are suggested for principals desiring to encourage collaboration and for comprehensive and modest undertakings Policymakers promotion of instructional leadership might help principals create a truly professional teaching environment 84
