**In My Own Words** Paul Galvin, 2014-10-30 One of the greatest GAA footballers of the modern era Paul Galvin has enjoyed a brilliant and at times controversial career Winning four senior All Ireland medals with Kerry and eight Munster championships he was also a three time All Star and 2009 Footballer of the Year His inter county career took off in the late 1990s when he picked up a Munster minor championship medal in 1997 and another at under 21 level in 1999 But it was in the senior team throughout the 2000s that Paul came into his own In a period defined by great rivalry with Tyrone he became a key playmaker for Kerry never failing to give his all in pursuit of victory Over the course of a career marked by courage physicality and an intense passion for the Green and Gold there were many glorious days There were other days too with controversial incidents that led to a number of suspensions most notably in 2008 the year in which Paul also had the honour of being the Kerry captain 2009 brought redemption But 2010 presented new challenges In this fiercely honest autobiography Paul offers in his own words a compelling unflinching account of a career that has fascinated football fans for over a decade

**Airpower Reborn** John Andreas Olsen, 2015-04-15 Airpower Reborn offers a conceptual approach to warfare that emphasizes airpower's unique capability to achieve strategic effects Six world leading theorists argue that a viable strategy must transcend the purely military sphere view the adversary as a multi dimensional system and pursue systemic paralysis and strategic effects rather than military destruction or attrition The book is divided into three parts The first section presents a historical perspective on airpower theory and airpower strategy tracing their evolution from the 1920s to the 1980s The second section contains in depth examinations of the strategic concepts that John R Boyd and John A Warden developed in the 1980s and 1990s with an

emphasis on their contemporary relevance The final section provides further context on modern airpower theory and strategy Theory in this setting serves as the basic paradigm strategy represents its generic mechanisms centered application and plans of campaign constitute the specific steps for any given situation In short the authors look beyond the land centric battlefield oriented paradigm that has continued to dominate military theories and strategies long after airpower offered new options The book acknowledges the essential role of advanced technology in improving airpower capabilities but emphasizes that air services must cultivate and harness the intellectual acumen of airmen and encourage officers and men to think conceptually and strategically about the application of aerospace power Modern airpower can offer political decision makers more and better options provided the underlying strategy coherently links the application of airpower directly to the end state objectives rather than limiting it to the battle The book recommends that all countries should consider establishing a dynamic and vibrant environment for mastering aerospace history theory strategy and doctrine a milieu for cultivating broader knowledge of and insight into airpower and a setting in which airpower experts have the opportunity to communicate their narrative to politicians the media and fellow officers and to interact to mutual benefit with experts from all sectors of governance This effort should emphasize the potentially unique contribution of airpower to political objectives and joint operations and in turn connect to operational headquarters that do operational planning Mastering such strategic thought lies at the heart of the military profession but it requires in depth knowledge and understanding of theory strategy and airpower and transcends traditional metrics

The Management Shift V. Hlupic, 2014-10-29 Research shows that corporate life expectancy and performance have declined 75% in the last 50 years organizations need a different approach if they are to survive let alone thrive While people are often stated as a company's greatest asset few businesses have a clear model of leadership that improves engagement removes barriers to innovation and uncovers hidden strengths in people and the organization This book addresses that need and more importantly demonstrates HOW organizations can make The Management Shift to a new way of thinking and working Professor Hlupic argues that

organizations now need to adopt a leadership style that focuses on people purpose and knowledge sharing creating new types of value and ultimately improving innovation and engagement leading to improved business Based on leading edge research supported by numerous case studies which demonstrate the power and impact of change The Management Shift offers managers a practical and systemic approach to diagnose leadership issues in their organization It then provides an implementation process to shift their mindset and organizational culture to the new level of thinking performance and ultimately business success

*Adapting for Inertia* Grant Douglas,2023-10-31 Despite much learning and research over many decades large ICT software projects have continued to experience poor outcomes or fallen short of original expectations some spectacularly so This is the case in the Australian and New Zealand public sectors even though these projects operate within historically developed institutional frameworks that provide the rules guidelines and controls and aim to consistently improve outcomes Something is amiss In *Adapting for Inertia* Grant Douglas questions the effectiveness of these institutional frameworks in governing large ICT software projects in the Australian and New Zealand public sectors He also gauges the perspectives of a large number of actors in projects in both sectors and examines two case studies in detail The main narrative to emerge is that the institutional frameworks are in a state of inertia they are failing to adapt owing to various institutional factors all of which have public policy implications Sadly Douglas finds this inertia is likely to continue If there is difficulty in changing the capacity to govern he proposes policymakers should look to change the nature of what is to be governed
