GRADE 8 – NOVEMBER 2013  
PAPER 1 – LANGUAGE  
TIME: 1 HOUR TOTAL: 50**

**INFORMATION AND INSTRUCTIONS**

1. This paper consists of three sections:  
SECTION A – Comprehension (20)  
SECTION B – Summary (10)  
SECTION C – Language (20)
2. Answer all the questions.
3. Begin the answer of each section on a new page.
4. Leave a line open between each answer.
5. It is important to write neatly.

**SECTION A – COMPREHENSION**

Read the following passage and answer the questions that follow:

**Teaching your children not to litter is a valuable life lesson.**

I can no longer simply drive past children who drop their chip packets, cooldrink cans and, sometimes entire fast-food packaging, as they walk home from school. Something inside me snaps and I tend to stop my car, interrogate them, and demand they pick up after themselves.

"Why did you throw that down in the street, when there's a rubbish bin a metre from where you dropped it?" I yell. The guilty 10-year-old glares at me as though I am insane or dangerous – perhaps I look it?

Curiously, it seems the whole idea of putting discarded wrappers into a bin designed for that purpose is a foreign concept to many of them. When pressed to answer my question, some of the responses have left me flabbergasted. "But I am creating jobs," said one indignant little litter-lout!

And it's not a stab in the dark to conclude that children like him are only doing what children everywhere do best: following the example set by their parents and caregivers in their lives. But attitudes like this are extremely dangerous. According to Alderman Clive Justus, Cape Town's Mayoral Committee Member for Utility Services, there seems to be a growing tolerance by the public, not only of litter, but of those responsible for it. What's more, this attitude is increasingly threatening the city's rating by international tourism organisations as one of the world's most beautiful cities and desirable holiday destinations, as residents continue to dump refuse illegally and indiscriminately fill our outdoor public spaces with litter.

"Children need to develop a sense of responsibility for themselves, others and the world in which they live in order to be contributing members of society," explains Johannesburg – based educational psychologist Melanie Hartgill.

**Bertrand Russell and the Nature of Propositions** Samuel Lebens,2017-05-25 Bertrand Russell and the Nature of Propositions offers the first book length defence of the Multiple Relation Theory of Judgement MRTJ Although the theory was much maligned by Wittgenstein and ultimately rejected by Russell himself Lebens shows that it provides a rich and insightful way to understand the nature of propositional content In Part I Lebens charts the trajectory of Russell's thought before he adopted the MRTJ Part II reviews the historical story of the theory What led Russell to deny the existence of propositions

altogether Why did the theory keep evolving throughout its short life What role did G F Stout play in the evolution of the theory What was Wittgenstein s concern with the theory and if we can t know what his concern was exactly then what are the best contending hypotheses And why did Russell give the theory up In Part III Lebens makes the case that Russell s concerns with the theory weren t worth its rejection Moreover he argues that the MRTJ does most of what we could want from an account of propositions at little philosophical cost This book bridges the history of early analytic philosophy with work in contemporary philosophy of language It advances a bold reading of the theory of descriptions and offers a new understanding of the role of Stout and the representation concern in the evolution of the MRTJ It also makes a decisive contribution to philosophy of language by demonstrating the viability of a no proposition theory of propositions *Conference proceedings. the space of possible reinforcement learning algorithms and their augmentation by intrinsic reinforcements of different kinds Research in robotics and machine learning is yielding systems with increasing autonomy and capacity for self improvement artificial systems with motivations that are similar to those of real organisms and support prolonged autonomous learning Computational research on intrinsic motivation is being complemented by and closely interacting with research that aims to build hierarchical architectures capable of acquiring storing and exploiting the knowledge and skills acquired through intrinsically motivated learning Now is an important moment in the study of intrinsically motivated open ended development requiring contributions and integration across a large number of fields within the cognitive sciences This Research Topic aims to contribute to this effort by welcoming papers carried out with ethological psychological neuroscientific and computational approaches as well as research that cuts across disciplines and approaches

### **Integrating Sustainability**

**Thinking in Science and Engineering Curricula** Walter Leal Filho, Ulisses M. Azeiteiro, Sandra Caeiro, Fátima

Alves, 2014-09-13 Including considerations of sustainability in universities activities has long since become mainstream However there is still much to be done with regard to the full integration of sustainability thinking into science and engineering curricula Among the problems that hinder progress in this field the lack of sound information on how to actually implement it is prominent Created in order to address this need this book presents a wealth of information on innovative approaches methods and tools that may be helpful in translating sustainability principles into practice
