GENERAL INFORMATION

The 6128, 6137, 6137R, 6138, 6139, 6139R, and 6139AV Remote Keypads are keypad addressable (no-DIP switches) and are intended for use with the controls listed in the table above. They can be set for the non-addressable operation (address 31) if required by the control with which they are used.

NOTE: The 6137R and 6139R have red bezels instead of gray. Otherwise, they are exactly the same as the 6137 and 6139, respectively.

The display on a Fixed-Word Keypad provides 2-digit numerics for zone identification and a set of pre-designated English language prompts (e.g.,"ALARM," "AWAY," "STAY," "CHECK," etc.) for indicating the system's status.

A 2-line Alpha Keypad is equipped with a programmable 2-line, 32 character (16 character per line) English language display for complete zone identification (if descriptors are programmed), plus system status. The 6139AV is an alpha keypad with a built-in speaker and microphone to be used with a VIM (2-Way Voice) module.

6138, One-Line Display Keypad: Some controls (e.g. Via30P, VISTA10, VISTA20) send two 1-line displays of information to the 6138 keypad. To display the second line of information, press the [#] key. Press the [#] key again to return to the first line of information. The display automatically returns to the first line of information if no key is pressed for 3 seconds.

NOTE: After pressing the [#] key to view the second line or return to the first line, wait at least 3 seconds before entering a control panel command (e.g., arm the system).

The keys on the keypads are located behind a decorative door, and are continuously backlit for convenience. The inside of the decorative door has space for a zone ID label (supplied) on which the installer can write descriptions of each zone for handy user reference.

All keypads allow Panic Alarm activation (if enabled in control programming). For the 6128, panic alarms are activated by pressing key pairs 1 & *, * & #, and 3 & #. The 6137/6137R, 6138, 6139/6139R, and 6139AV are equipped with dedicated single keys for panic activation — keys A, B, and C (the D key is not used as panic), which are equivalent to the 1 & *, * & #, and 3 & # keys, respectively.

Single panic keys (A, B, and C) must be held down for at least 2 seconds to activate an alarm.
A set of adhesive backed labels with some typical "panic" symbols (i.e., fire, police, personal emergency, etc.) is provided which can be placed on or next to these keys to identify each key's function for the end user (as determined by the control panel's capability and programming, see the control's instructions).

NOTE: That the function of the green "READY" LED (system ready) differs from the function of the green LED on Ademco's 4137AD, 5137AD and 6127 keypads.

WIRING AND INSTALLATION

The keypads can be surface mounted directly to a drywall, or to a single or double gang electrical box. For flush mounting the 6138 and 6139/6139R to drywall, use the optional 6139TRK flush mount kit (6128 & 6137/6137R /6139AV cannot be flush mounted).

1. **Remove the case back** by pushing down two "snaps". See diagram below.
2. **Route wiring** from the control panel through the opening in the case back.
3. **Mount the case back** to a wall or electrical box.
4. **Plug the supplied flying lead connector into the keypad PC board** and splice the panel wiring to it. Wire keypads and functions are described in the SPECIFICATIONS section.
5. **Re-attach the keypad** to its case back.
6. **Remove the clear protective films** from the LCD display and keypad labels.

Remove case back by pushing down 2 "snaps" along the keypad's top edge and pulling the case apart.
