Boating ,1990-07 **Lakeland Boating** ,2006 **Custom Electrical Panels and Wiring Harnesses** Robin G.

Coles,2014-11-14 Robin G Coles interviews Mark Rogers about Customizing Electrical Panels and Wiring Harnesses Inside you ll discover these key points Custom panels for a sailboat can have a selector switch for the navigation lights that is fed by a single breaker To connect a PC to a chart plotter to a VHF radio use something like the Blue Sea 2408 or similar terminal block with little ring terminals for each connection To be able to switch between US and European shore power install two different inlets on your boat and a selector switch to reconfigure the transformer You know it s time to replace the wiring on your boat when you see cracked insulation the conductors are turning green black or crumbling or if the wiring has been exposed to salt water and or the navigation lights aren t working properly Check the wiring in the bilge pump Using automotive wire or worse housing wire is illegal Make sure wires are properly terminated with crimped connectors or a proper type of Eurostyle terminal blocks Follow ABYC American Boat and Yacht Council guidelines They are a standard setting organization and many of their regulations closely follow national fire and electrical codes To prevent corrosion spray wires with a dielectric protectant once a year when you re commissioning the boat Generic batteries last an average of three to four years With premium batteries like Rolls plus well regulated charging systems the battery could last ten years or more A clever way to repair the rubber sleeve protector on an outboard external wiring harness is to open up a piece of split loomed tubing wrap it around the existing wiring harness and secure the two ends with hose clamps or cable tie wrap Think about any add ons or changes you might want to make in the future and design for those eventualities now
