## **Afrikaans November 2014 Memo:**

**Language, Ethnic Identity and the State** William Safran, J.A. Laponce, 2014-02-04 This new study powerfully asserts the pivotal importance of the interplay between language and ethnicity which is often underestimated as a component for political stability. These leading scholars present five key case studies of South Africa, Algeria, Canada, Latvia, and Senegal. All five countries are multilingual nations where language has been a central political issue that has challenged their unity and stability. These studies are underpinned by two general comparative and theoretical discussions which analyse how scholars consider social class and economic factors to be the primary sources for political cohesion or of malcontent with the system and the new avenues opened by a focus on issues of language. This book will be of great interest to all students and scholars of linguistics, language, politics, and sociology. This is a special issue of the leading journal *Nationalism and Ethnic Politics*.

**Talking Conflict** Anna M. Wittmann, 2016-12-05 In today's information era the use of specific words and language can serve as powerful tools that incite violence or sanitize and conceal the ugliness of war. This book examines the complex, twisted language of conflict. Why is the term collateral damage used when military strikes kill civilians? What is a catastrophic success? What is the difference between a privileged and unprivileged enemy belligerent? How does deterrence differ from detente? What does hybrid warfare mean and how is it different from asymmetric warfare? How is shell shock different from battle fatigue and PTSD? These are only a few of the questions that *Talking Conflict: The Loaded Language of Genocide, Political Violence, Terrorism, and Warfare* answers in its exploration of euphemisms, war-speak, doublespeak, and propagandistic terms. This handbook of alphabetically listed entries is prefaced by an introductory overview that provides background information about how language is used to obfuscate or minimize descriptions of armed conflict or genocide and presents examples of the major rhetorical devices used in this subject matter. The book focuses on the loaded language of conflict with many of the entries demonstrating the function of given terms as euphemisms, propaganda, or circumlocutions. Each entry is accompanied by a list of cross references and Further Reading suggestions that point readers to pertinent sources for further research. This book is ideal for students, especially those studying political science, international relations, and genocide, as well as general readers.
