Totally Pissed Off Robert "Bobeye" Inabinette,2012-02 Our government has been pissing me off for years and finally it boiled over Both parties have been creeping towards Socialism for years Obama and the Democrats have socialism on steroids The Republicans have been more subtle about it I thought we had some hope when the Republicans gained the House Speaker John Boehner is not much

better than Pelosi He caved on the debt ceiling and gives too much ground to Obama Obama his Czars and 98% of the Democrats are the most corrupt gang of thieves in history The reason the government hates the Mafia and drug cartels is because they are competing with our government With subsidies and the printing of money by the Feds billions or trillions have disappeared into a black hole There are millionaires being made within our government There is no accountability at all A Republican House is allowing this to happen Bernie Madoff will spend the rest of his life for doing the same thing in the private sector

Eisler,2022-12-06 The electric vehicle revival reflects negotiations between public policy which promotes clean fuel efficient vehicles and the auto industry which promotes high performance vehicles Electric cars were once as numerous as internal combustion engine cars before all but vanishing from American roads around World War I Now we are in the midst of an electric vehicle revival and the goal for a sustainable car seems to be within reach In *Age of Auto Electric* Matthew N Eisler shows that the halting development of the electric car in the intervening decades was a consequence of tensions between environmental energy and economic policy imperatives that informed a protracted reappraisal of the automobile system These factors drove the electric vehicle revival argues Eisler hastening automaking s transformation into a science based industry in the process Challenging the common assumption that the electric vehicle revival is due to the development of better batteries *Age of Auto Electric* instead focuses on changing environmental and socioeconomic conditions energy and environmental policies systems of energy conversion and industrial production and innovation practices that affected the prevalence and popularity of electric vehicles in recent decades Eisler describes a world in transition from legacy to alternative energy conversion systems and the promises compromises new problems and unintended consequences that enterprise has entailed **The Politics of Global Climate Change** Patrick M. Regan,2015-11-17 In 2009 the US House of Representatives passed legislation requiring reductions in greenhouse gas emissions by 18 percent over the coming decade Later that year President Obama went to Copenhagen to sign a treaty requiring reductions by 50 percent over a two decade period The President came back with nothing no firm commitment to reduce emissions and only a vague target to hold global temperature rises to under 2 C How does a President who has a 75 vote majority in the House and a 19 vote majority in the Senate who has pre approval for a treaty reducing greenhouse gas production by 18 percent not achieve a treaty with at least the minimum goal of 18 percent reductions by 2020 Others have answered the puzzle by looking at institutional designs or negotiation dynamics This book articulates a multilevel process that starts with local politics to explain how they can influence international negotiations and why President Obama s efforts in Copenhagen were doomed to fail Understanding the role of local private interests can help form strategies for overcoming national resistance to climate change legislation and ultimately international agreements that could change the environmentally self destructive course we are on
